**The Essence of Research Methodology** Jan Jonker, Bartjan Pennink, 2010-03-10 Methodology is the field which is indisputably complex. In the academic world it is often said to be important, yet in everyday academic practice it is not always treated accordingly. In teaching methodology is often a mandatory course. Usually it consists of learning how to adopt several common approaches when doing research and how to conceive a research design, often leading to a survey. This usually leads to collecting data on a modest scale and when the opportunity arises, analysing the data with the help of some statistics. Ask the students of their opinion at the end of such a course and they tend to heave a deep sigh of relief and say 'I have got through it'. Then their real courses start again in which methodology often does not play a role at all. We are of the opinion that writing off methodology in this way is a real pity. It ignores the valuable role that methodology should play in academic teaching as a whole. Here methodology is presented as a form of thinking and acting that while obviously entailing research work, can also include the design and

change of organisations This broad approach has been purposefully chosen as it is almost obvious from research and graduation projects that the students do not really have a clue what methodology involves and therefore wasting their time by producing work that has a little quality

**Knowledge Management and Narratives** Georg Schreyögg, 2005 For many organizations knowledge is one of the most important keys to success Knowledge management often plays a crucial role in organizational effectiveness Cover

**Accounting in Emerging Economies** Mathew Tsamenyi, Shahzad Uddin, 2009-11-19 Accounting research in emerging economies has grown over the years This title includes articles that contribute to our understanding of how accounting functions in emerging economies
