**Programming** Peter Norton, Virginia Andersen, 2000 The purpose of this book is to provide a bridge between Access 2000 as an efficient front end development tool and the intricate world of Visual Basic programming It is intended to offer the necessary tools for managing information in all levels of business from large offices to entrepreneurs and consultants Exercises throughout each chapter guide and encourage the reader in exploring the topics further using the files found on the accompanying CD **A Practical Introduction to Hardware/Software Codesign** Patrick R. Schaumont, 2012-11-27 This

textbook serves as an introduction to the subject of embedded systems design with emphasis on integration of custom hardware components with software The key problem addressed in the book is the following how can an embedded systems designer strike a balance between flexibility and efficiency The book describes how combining hardware design with software design leads to a solution to this important computer engineering problem The book covers four topics in hardware software codesign fundamentals the design space of custom architectures the hardware software interface and application examples The book comes with an associated design environment that helps the reader to perform experiments in hardware software codesign Each chapter also includes exercises and further reading suggestions Improvements in this second edition include labs and examples using modern FPGA environments from Xilinx and Altera which will make the material in this book applicable to a greater number of courses where these tools are already in use More examples and exercises have been added throughout the book If I were teaching a course on this subject I would use this as a resource and text If I were a student who wanted to learn codesign I would look for a course that at least used a similar approach If I were an engineer or

engineering manager who wanted to learn more about codesign from a very practical perspective I would read this book first before any other When I first started learning about codesign as a practitioner a book like this would have been the perfect introduction Grant Martin Tensilica Commerce Business Daily ,1999-07

**Object-Oriented and Internet-Based Technologies** Mathias Weske,Peter Liggesmeyer,2004-12-07 Based on the Net ObjectDays tradition of bringing together researchers from academia and industry on the one hand and system architects developers and users from industry and administration on the other hand this year's conference took an international research perspective so that we see the first volume of Net ObjectDays main conference proceedings published in the Springer Lecture Notes in Computer Science series This volume consists of 16 papers carefully selected in a rigorous reviewing process by an international program committee to provide a concise overview these papers are briefly described In the Languages and Models session Beate Ritterbach proposes a new language element for object oriented programming languages that supports arbitrary value types In her contribution Support for Value Types in an Object Oriented Programming Language she describes the corresponding keywords syntax and consistency checks thereby giving an impression of the look and feel of value types from an application programmer's perspective Walter Binder and Jarle Hulaas look at portable CPU accounting and control in Java which is based on program transformation techniques In their paper Self accounting as Principle for Portable CPU Control in Java periodically the threads of an application component aggregate the information of their respective CPU consumption within a shared account scheduling functions make sure applications do not exceed their allowed CPU share
