**Consumer and Business Credit Management** Robert Hartzell Cole,Lon Mishler,1995      Step by Step Guide Building Business Credit and Obtaining Financing Kevin J Sonnier,2023-11-26 Building business credit plays a crucial role in your company s funding ability Whether you operate as a limited liability company or corporation your business has the ability to establish a credit file separate from you as an individual When you register a business LLC LLP or corporation it becomes recognized as a separate legal entity with the ability to enter into contracts It s treated as a separate being from you as an individual If you operate as a sole proprietorship it s important to understand there is no legal or financial separation between you and your business If that s the case when you obtain credit or apply for funding all activity will be solely tied to you as an individual and reflected on your personal credit reports To keep your business and personal finances separate the first step is to start building credit in your company s name If you want to build business credit quickly here are five simple steps Step 1 Choose the Right Business Structure To make your business a distinct legal entity requires that you select a business structure such as an LLC LLP or corporation Remember sole proprietorships do not create a separate business entity Once you form your business entity the next step is to register your business This particular step is dependent on your structure and where your business is located Step 2 Obtain a Federal Tax ID Number EIN You can apply for a federal tax ID

for free using the IRS assistance tool This is a nine digit number assigned to your company which you will use for things such as filing company tax returns opening a business bank account applying for licenses and permits and applying for business credit Step 3 Open a Business Bank Account Once you have your federal tax ID you ll want to open a business bank account for your company This is a mandatory step in creating a clear separation between your business and personal expenses Your banking relationships play an important role in your company s funding potential Not only does your business bank account serve as a bank reference on credit applications but it also provides key data that lenders use during a funding review Step 4 Establish Credit with Vendors Suppliers Who Report One of the easiest ways to build business credit is to apply for net terms with vendors and suppliers As you buy supplies inventory or other materials on credit those purchases and payments get reported to business credit reporting agencies This activity creates your company s credit profile and business credit report After your company has several trade lines reporting a business credit rating score is generated Remember it s important to select vendors and suppliers that report to a business credit reporting agency Each relationship you have also serves as a trade reference that can be used on future credit applications as well Step 5 Monitor Your Business Credit Reports There are three major business credit reporting agencies so it s important to monitor each of your company credit files Each agency collects data from various sources and may have different information about your company The good news is each of the business credit agencies provides a way for you to update basic information about your business If you uncover any outdated or incorrect information you ll want to contact the agency to make the appropriate change With an established business credit report you may get higher credit approvals better interest rates and repayment terms on loans and lines of credit

**Credit Reporting Systems and the International Economy** Margaret J. Miller, 2003 The first comprehensive review of credit reporting systems worldwide including their institutional forms and evidence of their impact on financial markets Credit reporting is a critical part of the financial system in most developed economies but is often weak or absent in developing countries It addresses a fundamental problem of credit markets asymmetric information between borrowers and lenders that can lead to adverse selection and moral hazard The heart of a credit report is the record it provides of an individual s or a firm s payment history which enables lenders to evaluate credit risk more accurately and lower loan processing time and costs Credit reports also strengthen borrower discipline since nonpayment with one institution results in sanctions with others This book provides the first comprehensive review of credit reporting systems worldwide and documents the rapid growth in the industry It offers empirical and theoretical evidence of the impact of credit reporting on financial markets using examples from both developed and developing economies Credit reporting it shows significantly contributes to predicting default risk of potential borrowers which promotes increased lending activity The book also covers the role of public policy in the development of credit reporting initiatives including the role of public credit registries managed by central banks and the role of legal regulatory and institutional factors in supporting credit reporting **The Art**
