ABSTRACT

This paper explores the dynamic landscape of privacy laws as they pertain to digital communication in the United States. Beginning with a historical overview of privacy legislation, it traces the evolution of these laws in response to the advent and proliferation of digital technology. The paper then provides a detailed analysis of current privacy laws, such as the Electronic Communications Privacy Act (ECPA) and the California Consumer Privacy Act (CCPA), and examines key case studies to illustrate their application. Furthermore, it addresses the challenges and controversies inherent in enforcing privacy rights, with a particular focus on the tension of search and national security. A comparative analysis with international privacy laws, including the European GDPR, offers a global perspective on privacy regulation in the digital age. The paper concludes with potential future developments in privacy legislation and provides recommendations for policymakers and practitioners in the field of digital communication and privacy law. This research aims to contribute to the ongoing discourse on privacy rights and legal frameworks in the digital era, highlighting the need for adaptable and forward-thinking legal solutions.
