The setting menu is activated with the **mode** key. The display items are selected with the **↑**, **↓**, and **↔** keys if the mode key is pressed again. The corresponding value for the display item is shown and can be altered with the **↑**, **↓**, and **↔** keys. If the display with the unit is not continued within two minutes the device automatically returns to the measuring mode without accepting the new values.

To maximize programming time quickly, you can switch back to the simulating mode (entry mode) from any state in the state by holding the **STOP** command for five seconds.

If the software has been activated, the values can be directly fed to changes made. In other words (if it is active) "L1004" appears in the location where an offset is made to change values.
