Areas and Volumes- The Volume of a Sphere
 Worksheet

Name: _____

Class: _____ ()

We have learnt the formulae for the volumes of a cone and a cylinder. In this worksheet, we would like to find out the relation between the volumes of a cone, a cylinder and a sphere, so as to obtain the formula for the volume of a sphere.

We will not compare the cone, cylinder and sphere directly. We will instead compare a hemisphere with a solid formed by subtracting a cone from a cylinder. The cone and cylinder concerned share the same base radius and height with the hemisphere, as shown in the following figures.^(*)

hemisphere

"cylinder - cone"

cross section

cross section

We will apply "The Principle of Zu-Geng" to prove that the solid and the hemisphere are equal in volume. That is to prove that sections A and B are equal in area for any possible values of h .

^(*) A method originated by the famous ancient Greek mathematician Archimedes. (287 B.C. - 212 B.C.)
