

CHAPTER TWO

Cost Terminology and Classification

2.1 Cost and Cost Object

Managers need to understand costs in order to interpret and act on accounting reports. Managers who understand cost concepts and terms are best able to use the information provided and can avoid misusing it. A common understanding of cost concepts and terms helps communication among managers and management accountants. In this chapter, we will discuss cost concepts and terms that are the basis for accounting information used for internal and external reporting.

Definition 2.1

Cost is a resource sacrificed or forgone to achieve specific objective

Definition 2:2

A cost object is any thing for which a separate measurement of cost is desired

How do accountants relate activities to resource costs in away that make cost control possible? Accountants first identify the activities in their organization and determine measures of output for each activity. They then relate each output measures to the resources that are necessary to produce it. Any output measure that causes cost (that is, causes the use of costly resources) is called a cost driver. Look at the following Exhibit.
