The Trouble with Kings Stephen McKenzie, 2014-10-22 This book investigates the composition of the book of Kings and its implications for the Deuteronomistic History (DH) of which it is a part McKenzie analyses Kings on the basis of Noth's model of a single author/editor behind the original DH He contends that the Deuteronomist (Dtr) wrote the series of oracles against the Northern royal houses without utilizing a prior running prophetic document that some scholars have posited behind Samuel and Kings He regards many other prophetic stories in Kings including most of the Elijah and Elisha legends as later additions to the DH in accord with Noth's recognition that the original DH was frequently supplemented by various writers McKenzie illustrates Dtr's compositional techniques in a treatment of the accounts of Hezekiah and Josiah in Kings He tentatively dates Dtr to Josiah's reign but believes that tensions among the many later additions to the work including the report from Josiah's death on suggest that they are not the result of systematic editing e.g. Dtr2 The book offers the most up to date survey of research on the DH and the most recent detailed analysis of the lengthy variant version of Jeroboam's reign in LXXB at 1 Kings 12:24a-z It offers a fresh perspective on the original shape of the DH based on recent scholarship and the author's own critical investigation

Steinbach, 2017-11-20 We gratefully acknowledge the financial support of COST European Cooperation in Science and Technology funded by the Horizon 2020 Framework Programme of the European Union Current grammatical knowledge

about particular sign languages is fragmentary and of varying reliability and it appears scattered in scientific publications where the description is often intertwined with the analysis In general comprehensive grammars are a rarity The SignGram Blueprint is an innovative tool for the grammar writer a full fledged guide to describing all components of the grammars of sign languages in a thorough and systematic way and with the highest scientific standards The work builds on the existing knowledge in Descriptive Linguistics but also on the insights from Theoretical Linguistics It consists of two main parts running in parallel the Checklist with all the grammatical features and phenomena the grammar writer can address and the accompanying Manual with the relevant background information definitions methodological caveats representative examples tests pointers to elicitation materials and bibliographical references The areas covered are Phonology Morphology Lexicon Syntax and Meaning The Manual is endowed with hyperlinks that connect information across the work and with a pop up glossary The SignGram Blueprint will be a landmark for the description of sign language grammars in terms of quality and quantity

Game Theory as a Theory of Conflict Resolution Anatol Rapoport, 1974-05-31 Game theory could be formally defined as a theory of rational decision in conflict situations Models of such situations as they are conceived in game theory involve 1 a set of decision makers called players 2 a set of strategies available to each player 3 a set of outcomes each of which is a result of particular choices of strategies made by the players on a given play of the game and 4 a set of payoffs accorded to

each player in each of the possible outcomes It is assumed that each player is individually rational in the sense that his preference ordering of the outcomes is determined by the order of magnitudes of his and only his associated payoffs Further a player is rational in the sense that he assumes that every other player is rational in the above sense The rational player utilizes knowledge of the other players payoffs in guiding his choice of strategy because it gives him information about how the other players choices are guided Since in general the orders of magnitude of the payoffs that accrue to the several players in the several outcomes do not coincide a game of strategy is a model of a situation involving conflicts of interests
