**Critical Reflections on Public Private Partnerships** Jasmine Gideon, Elaine Unterhalter, 2020-12-21 This book argues that despite the hype within many policy circles there is actually very little evidence to support the presumed benefits of Public Private Partnerships PPPs in reducing poverty and addressing inequalities in the provision of and access to public services Taking a cross sectoral comparative approach this book investigates how PPPs have played out in practice and what the implications have been for

inequalities Drawing on a range of empirical case studies in education healthcare housing and water the book picks apart the roles of PPPs as financing mechanisms in several international and national contexts and considers the similarities and differences between sectors The global COVID 19 pandemic has raised significant questions about the future of social provision and through its analysis of the emergence and expansion of the role of PPPs the book also makes a vital contribution to current discussion over this rapidly changing landscape Overall this wide ranging guide to understanding and evaluating the role of PPPs in the Global South will be useful to researchers within development international relations economics and related fields as well as to policy makers and practitioners working in development related policy

**The Financialization of Agri-Food Systems** Hilde Bjorkhaug, André Magnan, Geoffrey Lawrence, 2018-10-09 Financialization is the increased influence of financial actors and logics on social and economic life and is one of the key drivers transforming food systems and rural economies around the world The premise of this book is that the actions of financial actors and their financial logics are transforming agri food systems in profound ways It is shown that although financialization is a powerful dynamic some recent developments suggest that the rollout of financialization is contradictory and uneven in different spaces and markets The book examines cases in which state regulation or re regulation and social movement resistance are setting roadblocks or speed bumps in the path of financialization resulting in a cooling off of investment as well as the other side of the argument where there is evidence of a heating up The authors address not only the limits to financialization but also the mechanisms through which financial entities are able to penetrate and re shape agri food industries This book provides both a comparative analysis of financialization blending and empirical findings with conceptual insights It explores the connection between financialization food systems and rural transformation by critically examining the concept of financialization and how food and farming are being financialized the impacts of financialization in the food industry and financialization in farming and forestry along with the impacts this has on rural people and communities This is a timely book bringing together concrete case studies from around the globe to reveal the operations and impacts of finance capital in the space of agri food
