Advanced Solutions in Power Systems Mircea Eremia,Chen-Ching Liu,Abdel-Aty Edris,2016-08-31 Provides insight on both classical means and new trends in the application of power electronic and artificial intelligence techniques in power system operation and control This book presents advanced solutions for power system controllability improvement transmission capability enhancement and operation planning The book is organized into three parts The first part describes the CSC HVDC and VSC HVDC technologies the second part presents the FACTS devices and the third part refers to the artificial intelligence techniques All technologies and tools approached in this book are essential for power system

development to comply with the smart grid requirements Discusses detailed operating principles and diagrams theory of modeling control strategies and physical installations around the world of HVDC and FACTS systems Covers a wide range of Artificial Intelligence techniques that are successfully applied for many power system problems from planning and monitoring to operation and control Each chapter is carefully edited with drawings and illustrations that helps the reader to easily understand the principles of operation or application Advanced Solutions in Power Systems HVDC FACTS and Artificial Intelligence is written for graduate students researchers in transmission and distribution networks and power system operation This book also serves as a reference for professional software developers and practicing engineers Advanced Solid-state Devices for Emerging Nanotechnologies Tarikul Islam, Shakeb Khan, Mohammad Khan, Monika Tomar, Shabana Mehruz, 2025-09-12 Advanced Solid state Devices for Emerging Technologies provides a comprehensive overview of the transformative role played by nanotechnology in the development of solid state devices for various applications including efficient signal processing power data communication sensor and IoT enabled devices The introductory section of the book provides the fundamental working principles of the solid state devices for signal processing energy harvesting and sensing of stimulants highlighting their significance for addressing some of the present challenges The book also discusses the key structures of the devices with different functional units the role of basic and functionalized nanomaterials in enhancing their performance with diverse applications potential for sensing powering devices and signal processing Other aspects covered include the experimental methods procedures in determining the response parameters of the devices and the application of artificial intelligence in modelling and optimization of system parameters The proposed book is useful for researchers graduate students and undergraduate students working technical professionals in engineering and the sciences Key Features Discusses advanced materials and structures for developing emerging technologies for micro and nano applications Development of efficient interfacing and signal processing circuits with the idea of machine learning based sensor data and fault analysis Covers open research challenges and the future scope of research directions on emerging micro to nano technology *International Conference on Advanced Intelligent Systems for Sustainable Development (AI2SD 2024)* Mostafa Ezziyyani, Janusz Kacprzyk, Valentina Emilia Balas, 2025-07-19 This book provides a dynamic platform for exploring groundbreaking advancements in intelligent systems for sustainable development It offers readers access to the latest technologies and innovative solutions that address global challenges Bringing together leading academics pioneering researchers and industry leaders fosters knowledge exchange across various fields such as health education agriculture energy and security It enables readers to gain valuable insights build strategic partnerships and contribute to shaping a more sustainable future This book bridges scientific research with practical applications and is ideal for researchers practitioners and decision makers driving progress across multiple disciplines **Automated Reasoning for Systems Biology and Medicine** Pietro Liò, Paolo Zuliani, 2019-06-11 This book presents outstanding contributions in an exciting new and

multidisciplinary research area the application of formal automated reasoning techniques to analyse complex models in systems biology and systems medicine Automated reasoning is a field of computer science devoted to the development of algorithms that yield trustworthy answers providing a basis of sound logical reasoning For example in the semiconductor industry formal verification is instrumental to ensuring that chip designs are free of defects or bugs Over the past 15 years systems biology and systems medicine have been introduced in an attempt to understand the enormous complexity of life from a computational point of view This has generated a wealth of new knowledge in the form of computational models whose staggering complexity makes manual analysis methods infeasible Sound trusted and automated means of analysing the models are thus required in order to be able to trust their conclusions Above all this is crucial to engineering safe biomedical devices and to reducing our reliance on wet lab experiments and clinical trials which will in turn produce lower economic and societal costs Some examples of the questions addressed here include Can we automatically adjust medications for patients with multiple chronic conditions Can we verify that an artificial pancreas system delivers insulin in a way that ensures Type 1 diabetic patients never suffer from hyperglycaemia or hypoglycaemia And lastly can we predict what kind of mutations a cancer cell is likely to undergo This book brings together leading researchers from a number of highly interdisciplinary areas including Parameter inference from time series Model selection Network structure identification Machine learning Systems medicine Hypothesis generation from experimental data Systems biology systems medicine and digital pathology Verification of biomedical devices This book presents a comprehensive spectrum of model focused analysis techniques for biological systems an essential resource for tracking the developments of a fast moving field that promises to revolutionize biology and medicine by the automated analysis of models and data Prof Luca Cardelli FRS University of Oxford
