Pedley, Jean Aicardi, 2008 Written and edited by world-renowned authorities, this three-volume work is, to quote a reviewer, the definitive textbook about seizures and epilepsy. This Second Edition is thoroughly updated and gives you a complete print and multimedia package: the three-volume set plus access to an integrated content Website. More than 300 chapters cover the spectrum of biology, physiology and clinical information from molecular biology to public health concerns in developing countries. Included are detailed discussions of seizure types and epilepsy syndromes, relationships between physiology and clinical events, psychiatric and medical comorbidity conditions that could be mistaken for epilepsy, and an increasing range of pharmacologic, surgical and alternative therapies including vagus nerve stimulation and deep brain stimulation. This edition describes many new antiepileptic drugs, major advances in surgical treatment and state-of-the-art neuroimaging, EEG and other technologies for diagnosis and seizure prediction. A companion Website offers instant access to the complete, fully searchable text plus an image bank of additional figures, video footage and annual updates to selected chapters. **Mendelian Inheritance in Man** Victor Almon McKusick, 1998 **Index Medicus**, 2003 Vols for 1963 include as pt 2 of the Jan issue. **Extended Heredity** Russell Bonduriansky,Troy Day,2020-04-14 Bonduriansky and Day challenge the premise that genes alone mediate the transmission of biological information across generations and provide the raw material for natural selection They explore the latest research showing that what happens during our lifetimes and even our parents and grandparents lifetimes can influence the features of our descendants Based on this evidence Bonduriansky and Day develop an extended concept of heredity that upends ideas about how traits can and cannot be transmitted across generations opening the door to a new understanding of inheritance evolution and even human health Adapted from publisher description
