Name: Key

**IMPORTANT:** When you have completed your study guide, check your answers on Haiku in a **different colored** writing utensil. You **MUST** do the Haiku check to get full credit. Give yourself a check for a correct answer. Correct your mistakes for what you got wrong.

### Section 1: Multiple Choice

1. When we take a census, we attempt to collect data from

- a) A stratified random sample.
- b) Every individual chosen in a simple random sample.
- ☒ c) Every individual in the population.
- d) A voluntary response sample.
- e) A Convenience sample.

2. A study of treatments for angina (pain due to low blood supply to the heart) compared bypass surgery, angioplasty, and use of drugs. The study looked at the medical records of thousands of angina patients whose doctors had chosen one of these treatments. It found that the average survival time of patients given drugs was the highest. What do you conclude?

- a) This study proves that drugs prolong life and should be the treatment of choice.
- b) We can conclude that drugs prolong life because the study was a comparative experiment.
- c) We can't conclude that drugs prolong life because the patients were volunteers.
- ☒ d) We can't conclude that drugs prolong life because the groups might differ in ways besides the treatment.
- e) We can't conclude that drugs prolong life because no placebo was used.

3. Ruby wanted to estimate the average amount of time that students at her school spend on Facebook each day. She gets an alphabetical roster of students in the school from the registrar's office and numbers the students from 1 to 1137. Then Ruby uses a random number generator to pick 30 distinct labels from 1 to 1137. She surveys those 30 students about their Facebook use. Ruby's sample is a simple random sample because

- a) It was selected using a chance process.
- b) It gave every individual the same chance to be selected.
- ☒ c) It gave every possible sample of size 30 an equal chance to be selected.
- d) It doesn't involve strata or clusters.
- e) It is guaranteed to be representative of the population.

Passman, 2003 Elsevier's Surgical Technology Exam Review - E-Book Anbalagan George, Joseph E Charleman, 2017-01-29 The all in one surgical

technology review you've been waiting for is finally here Elsevier's Surgical Technology Exam Review combines comprehensive content review, worktext practice and customizable simulated testing options to give you the 360 degree preparation needed for success on the CST exam. Content chapters offer a thorough review of the CST exam focus areas including medical terminology, basic science, asepsis, surgical technique and surgical procedures all in a helpful outline format. Each chapter also features full color images and illustrations, review questions with rationales and surgical concept maps. A sample exam at the end of the book provides a simulated test day experience. The realistic preparation continues online with a testing engine that lets you access exam questions by category or create custom generated exams that match the format of the CST exam. If you're looking to pass the CST and be fully prepared for clinical practice, this is the one Surgical Technology review book that you can't afford to be without. UNIQUE All in one resource incorporates content discussions, worktext practice, review questions and six full practice exams to fully prepare users for the certification exam. UNIQUE Surgical concept maps in the worktext help emphasize the critical thinking skills needed for clinical success by combining relevant medical terminology, anatomy, pathophysiology, microbiology and pharmacology for each surgical procedure and helping users learn how to apply that foundational knowledge to the operating room. Content chapters offer a thorough review of the CST exam focus areas including medical terminology, basic science, asepsis, surgical technique and surgical procedures all in an outline format. National Board format utilizes the exam blueprint for the National Board of Surgical Technology and Surgical Assisting's CST exam to organize content and practice exams. Six practice exams each with 175 questions help users improve familiarity with answering exam style questions and build test taking confidence. Realistic testing experience utilizes an online computer based testing environment and timing function to mimic the actual testing experience. Practice exam customization enables users to practice specific CST blueprint categories in practice mode or use an auto generator for full CST style tests in exam mode. Answer keys and rationales for each chapter review question and practice test question help users fully comprehend the information being asked and why a specific choice is best. UNIQUE Full color photos and illustrations offer vivid images of instruments, equipment, clinical situations, concept maps and basic science to help improve comprehension. Chapter review questions allow users to test their level of comprehension before moving onto the next chapter and provide practice for the simulated exams.

*A Review of Pharmaceutical Science. Support for Viva and Job Interviews* Abdul Kader Mohiuddin, 2020-07-28 Academic Paper from the year 2020 in the subject Pharmacology grade 12. 0 language English abstract The study helps to highlight the pharmacist's roles and responsibilities along with basic pharmacy education with the most recent information obtained from publications in several journals, books, bulletins, newsletters, magazines. Also many of the prospective viva and interview questions are solved along with a few chapter outlines covering many of the pharmacy courses. However it is very important to remember that no study aid can help do well in a viva session or job interview unless a knowledge base is kept sharp. This study aims to support a pharmacy student or professional to

give an accelerated mental support when books are not feasible to carry before an interview and viva session The expanded role of pharmacists uplifts them to patient care industrial marketing regulatory affairs from dispensing and manufacturing of drugs The sector is emerging in both developed and under developed countries Furthermore pharmacy teaching institutions need to revise and update their curricula to accommodate the progressively increasing development in the pharmaceutical education and the evolving new roles of practicing pharmacists in healthcare arena
