Change in Medieval Society Sylvia Lettice Thrupp, 1965 *World History: Patterns of Interaction* McDougal-Littell Publishing Staff, 2004-03 **Indiana University Studies** Indiana University, 1928 *The Social Inheritance of the Holocaust* A. Reading, 2002-11-26 This book challenges current thinking on memory by examining the complex ways in which the social inheritance of the Nazi Holocaust is gendered. It considers how the past is handed down in the US, Poland, and Britain through historiography, autobiographies, documentary and feature films, memorial sites and museums. It explores the configuration of socially inherited memories about the Holocaust in young people of different cultural backgrounds. Scholarly and accessible, the book provides a groundbreaking approach to understanding the significance of gender in relation to cultural mediations of history.

Women's Monasticism and Medieval Society Bruce L. Venarde, 1999 In this engaging work, Bruce L. Venarde uncovers a largely unknown story of women's religious lives and puts female monasticism back in the mainstream of medieval ecclesiastical history. To chart the expansion of nunneries in France and England during the central Middle Ages, he presents statistics and narratives to describe growth in broad historical contexts, with special attention to social and economic change. Venarde explains that in the years 1000-1300, the number of nunneries within Europe grew tenfold. In the eleventh and twelfth centuries, religious institutions for women developed in a variety of ways, mostly outside the self-conscious reform movements that have been the traditional focus of monastic history. Not reforming monks but wandering preachers, bishops, and the women and men of local petty aristocracies made possible the foundation of new nunneries. In times of increased agrarian wealth, decentralization of power, and a shortage of potential spouses, many women decided to become nuns, and

proved especially adept at combining spiritual search with practical acumen This era of expansion came to an end in the thirteenth century when forces of regulation and new economic realities reduced radically the number of new nunneries Venarde argues that the factors encouraging and inhibiting monastic foundations for men and women were much more similar than scholars have previously assumed World Studies: Medieval Times to Today Heidi Hayes Jacobs, Michal L.
