

## Chapter 1 Notes - Part 1 - Geography of a Changing World

### Themes in World Regional Geography

- **Central Themes:**
  - Areal Differences - what distinguishes one place from another?
  - Interconnections of locations
  - Through physical or cultural features
- **Scale: Global to Local**
  - Units of Study - village, city?
  - Areas of analysis
  - Integration, interactivity, and connectivity

### The Cultural Landscape: Space into Place

Humans transform space into distinct spaces that are unique

- **Place**
  - Placefulness or "sense of place"
  - Tell about interactions of humans and nature
  - Include geographic location and meaning given to an area
- **Cultural Landscape**
  - Tangible, material expression of settlement
  - Vary greatly around the world, e.g. values, history
- **Space**
  - Abstract, model-driven way of understanding connections, e.g. development levels

### Regions: Formal and Functional

- **Regions**
  - Contiguous bounded territory with common characteristics
- **Formal Regions**
  - Defined by physical and/or cultural features e.g. climate
- **Functional Regions**
  - Defined by activities e.g. manufacturing
- **Regions by Scale**
  - World region

**Online Weather Studies Text** American Meteorological Society, 2004 [Review of the U.S. Climate Change Science Program's Synthesis and Assessment Product 3.3, "Weather and Climate Extremes in a Changing Climate"](#) National Research Council, Division on Earth and Life Studies, Board on Atmospheric Sciences and Climate, Committee to Review the U.S. Climate Change Science Program's Synthesis and Assessment Product 3.3, 2007-07-18 This National Research Council NRC report reviews a draft of the U.S. Climate Change Science Program CCSP Synthesis and Assessment Product 3.3 Weather and Climate Extremes in a Changing Climate the 3rd in a series of 21 CCSP products addressing important topics related to climate change The NRC report finds that the draft provides a good and thorough assessment of the important issues regarding extreme events over North America and how they may change in the context of a changing climate The continuity and cohesion among the chapters could be improved by greater coordination among the chapter authorship teams who should also ensure that the tone and scope of the chapters are consistent with the document's Abstract and Executive Summary The authors should strive to consolidate the sections on tropical cyclones however the discussion of drought and ecological impacts could be expanded Overall the committee finds that the scope content and scientific rigor of the current draft provide a solid basis for the final version of Synthesis and Assessment Product 3.3

**Resources for Teaching Middle School Science** Smithsonian Institution, National Academy of Engineering, National Science Resources Center of the National Academy of Sciences, Institute of Medicine, 1998-04-30 With age appropriate inquiry centered curriculum materials and sound teaching practices middle school science can capture the interest and energy of adolescent students and expand their understanding of the world around them Resources for Teaching Middle School Science developed by the National Science Resources Center NSRC is a valuable tool for identifying and selecting effective science curriculum materials that will engage students in grades 6 through 8 The volume describes more than 400

curriculum titles that are aligned with the National Science Education Standards This completely new guide follows on the success of Resources for Teaching Elementary School Science the first in the NSRC series of annotated guides to hands on inquiry centered curriculum materials and other resources for science teachers The curriculum materials in the new guide are grouped in five chapters by scientific area Physical Science Life Science Environmental Science Earth and Space Science and Multidisciplinary and Applied Science They are also grouped by type core materials supplementary units and science activity books Each annotation of curriculum material includes a recommended grade level a description of the activities involved and of what students can be expected to learn a list of accompanying materials a reading level and ordering information The curriculum materials included in this book were selected by panels of teachers and scientists using evaluation criteria developed for the guide The criteria reflect and incorporate goals and principles of the National Science Education Standards The annotations designate the specific content standards on which these curriculum pieces focus In addition to the curriculum chapters the guide contains six chapters of diverse resources that are directly relevant to middle school science Among these is a chapter on educational software and multimedia programs chapters on books about science and teaching directories and guides to science trade books and periodicals for teachers and students Another section features institutional resources One chapter lists about 600 science centers museums and zoos where teachers can take middle school students for interactive science experiences Another chapter describes nearly 140 professional associations and U S government agencies that offer resources and assistance Authoritative extensive and thoroughly indexed and the only guide of its kind Resources for Teaching Middle School Science will be the most used book on the shelf for science teachers school administrators teacher trainers science curriculum specialists advocates of hands on science teaching and concerned parents

*Science Interactions* Robert W. Avakian,1995-07-17      Essentials of Medical Meteorology Mladjen Ćurić,Oliver Zafirovski,Vlado Spiridonov,2021-11-30 This book discusses the impacts that weather and climate have on human physical health longevity and mental wellness and acts as a guide to the application of meteorological science in health care It provides a background on biometeorology by covering basic concepts of human anatomy and meteorology and how modern biometeorological science can be incorporated into medical practice through diagnosis prevention and treatment of physical and mental diseases The recommendations advice and preventive measures addressed in this book aim to help people adapt to different weather phenomena and changes to minimize negative health consequences which is increasingly relevant as climate change and its effects on human health become more pronounced and studied The book is intended for environmental epidemiologists medical students physicians health care providers climate scientists insurance industries and policy makers but will also appeal to general enthusiasts of atmospheric climate and medical sciences
