loyalty to one's homeland Gellner's intensely creative thesis is that the nationalism we know today is actually the product of the 19th century industrial revolution which radically reshaped ancient communities encouraging emigration to cities at the same time as it improved literacy rates and introduced mass education Gellner connected these three elements in an entirely new way contrasting developments to the structures of pre industrial agrarian economies to show why the new nationalism could not have been born in such communities He was also successful in generating a typology of nationalisms in an attempt to explain why some forms flourished while others fizzled out His remarkable ability to produce novel explanations for existing evidence marks out *Nations and Nationalism* as one of the most radical stimulating and enduringly influential works of its day
