## Polarization

The amplitude of a light wave has magnitude and direction and can be represented by a vector. Polarized light vibrates in a single direction and is represented by a single vector. To the left, the single vector represents vertically polarized light. The vibrations of non-polarized light are equal in all directions. There are as many vertical components as horizontal components. The pair of perpendicular vectors to the right represents non-polarized light.

1. In the sketch below, non-polarized light from a flashlight strikes a pair of polarizing filters.

- a. Light is transmitted by a pair of polarizing filters when their axes are (aligned) (crossed at right angles)

and light is blocked when their axes are (aligned) (crossed at right angles).

- b. Transmitted light is polarized in a direction (the same as) (different than) the polarization axis of the filter.

2. Consider the transmission of light through a pair of polarizing filters with polarization axes at  $45^\circ$  to each other. Although in practice the polarizing filters are one atop the other, we show them spread out side by side below. From left to right: (a) Non-polarized light is represented by its horizontal and vertical components. (b) These components strike filter A. (c) The vertical component is transmitted, and (d) falls upon filter B. This vertical component is not aligned with the polarization axis of filter B, but it has a component that is — component t; (e) which is transmitted.

- a. The amount of light that gets through Filter B, compared to the amount that gets through Filter A is (more) (less) (the same).

- b. The component perpendicular to t that falls on Filter B is (also transmitted) (absorbed).

*Writing on the Wall* Philip Van Notten, 2005 Although the significance of 9 11 is subject to debate it is symbolic of a general sentiment of discontinuity whereby society is vulnerable to undefined and highly disruptive events Recent catalysts of this sentiment are eye catching developments such as the SARS Severe Acute Respiratory Syndrome and bird flu outbreaks the Enron and Parmalat scandals political assassinations in Sweden and the Netherlands regime changes in Iraq and Afghanistan and terrorist attacks in Bali Istanbul Madrid and various parts of the Middle East However recent discontinuities should not be seen as evidence that discontinuities occur more frequently now than they did before Looking back in history we see that disruptive processes are common For example 25 years ago few Europeans would have predicted the upcoming upheavals on their own continent the collapse of communism Berlin as the capital of a reunited Germany the wars in the former Yugoslavia the single European currency and the near doubling of the number of European Union member states Changes elsewhere have been no less discontinuous and unforeseen the fall of the Asian tigers the emergence of the Internet and mobile telecommunication and the presidency of Nelson Mandela Societal discontinuity is a relatively new area of concern in policy development Since the 1970s the consideration of change and discontinuity has gained some ground over predictive forecasting which tended to reason from continuous developments and linear processes Rather than making forecasting the future it has become popular to use scenarios as a manner to consider several possible futures Scenarios are coherent descriptions of alternative hypothetical futures that reflect different perspectives on past present and future developments which can serve as a basis for action Scenario development aims to combine analytical knowledge with creative thinking in an effort to capture a wide range of possible future developments in a limited number of outlooks Scenario development assumes that the future is uncertain and the directions in which current developments might range from the conventional to the revolutionary In theory scenario development is a way to consider future discontinuity However there are indications that the theoretical promise is not reflected in scenario practice Research has shown that scenarios do not consider the idea of discontinuity as a matter of course In our research we found that a scenario study would benefit from efforts to create and foster a culture of curiosity for exploring the future and the possible discontinuities rather than simply commissioning a scenario study to provide insights about the future Only then can one read the writing on the wall of future developments

Theoretical Nursing Afaf Ibrahim Meleis, 2011 An additional assumption was that the processes for theory development were new to nursing and hence nurses in graduate programs learned strategies for advancing knowledge from other disciplines This assumption was debunked with the knowledge that nurses were always engaged in knowledge development driven by their experiences in clinical practice Because of these assumptions most of the early writing about theory development was about outlining strategies that should be used rather than strategies that have already been used in the discipline to develop theories Theorists themselves did not uncover or adequately discuss ways by which they developed

their theories therefore the tendency was to describe processes that were based on theories developed in other disciplines mainly the physical and social sciences And an implicit assumption was made that there should be a single strategy for theory development some claiming to begin the process from practice and others believing it should be driven by research Provided by publisher *Discoveries* Houghton Mifflin Company,1988-03 **Integrated Natural Resource Management** Bruce Morgan Campbell,Jeffrey Sayer,2003 This book which contains 15 separately authored chapters discusses both the principles and applications of an integrated approach to natural resource management Such an approach must embrace the complexity of systems and redirect research towards the greater inclusion of issues such as participatory approaches multi scale analysis and an array of tools for system analysis information management and impact assessment Case studies particularly from developing countries in Asia Africa and Latin America are included This book is of interest to a wide range of readers in many disciplines including forestry soil and management sciences agriculture and development studies **Impact Assessment and Project Appraisal** ,2001 *The Invisalign System* Orhan C.
