Chapter 23 Electric Current

Circuit Resistance

Figure what the resistances are, then show their values in the blanks to the left of each lamp.

All circuits below have the same lamp A with resistance of $6\ \Omega$ and the same 12-volt battery with negligible resistance. The unknown resistances of lamps B through L are such that the current in lamp A remains 1 ampere. Fill in the blanks.

Circuit a: How much current flows through the battery? 1 A.

Circuit b: Assume lamps C and D are identical. Current through lamp D is 0.5 A.

Circuit c: Identical lamps E and F replace lamp D. Current through lamp C is 0.5 A.

Circuit d: Lamps G and H replace lamps E and F, and the resistance of lamp G is twice that of lamp H. Current through lamp H is 0.5 A.

Handy rule: For a pair of resistors in parallel:
Equivalent resistance = $\frac{\text{product of resistances}}{\text{sum of resistances}}$

Circuit e: Identical lamps K and L replace lamp H. Current through lamp L is 0.25 A.

The equivalent resistance of a circuit is the value of a single resistor that will replace all the resistors of the circuit to produce the same load on the battery. How do the equivalent resistances of the circuits a through e compare?

All are the same

A Rule of Law for Our New Age of Anxiety Stephen J Toope, 2023-06-01 Taking Auden's Age of Anxiety as a leitmotiv and drawing on literature from law philosophy political theory international relations and sociology Toope argues with passion that a renewed faith in the rule of law can address troubling developments in our own anxious times populist nationalism globalisation and disruptive technologies with their dominating platforms We can address anxiety by bolstering social resilience drawing upon a plural intellectual heritage That heritage reveals a unique type of authority in society epistemic practical authority built up continuously through social discourse and action shifting focus from the state of being to the dynamic of becoming What is law's role in this world The modest yet powerful version of the rule of law advocated here is one that draws on a wellspring of practical wisdom prudence gleaned from pragmatic experience It chastens power while not disconnecting law from other sources of social action and human agency **Physics for Scientists and Engineers**

form of cultural relativism Pre comprehension which guides interpretation imposes strict limits to the descriptive categories which can be used and to the manner in which they can be linked to appropriate empirical objects The author applies his hermeneutic principles to the study of visual perception In fact this question is treated in the first part of the book
