Myers, Richard O. Straub, 2009-04-03 Longtime Myers collaborator Richard Straub provides an updated study guide for the new edition Incremental Learning for Motion Prediction of Pedestrians and Vehicles Alejandro Dizan Vasquez Govea, 2010-06-23 This book focuses on the problem of moving in a cluttered environment with pedestrians and vehicles A framework based on Hidden Markov models is developed to learn typical motion patterns which can be used to predict motion on the basis of sensor data *The Segmentation and Representation of Translocative Motion Events in English and Chinese Discourse* Guofeng Zheng, 2020-12-01 This book provides a systematic contrastive analysis of the segmentation and representation of English and Chinese Translocative Motion Events TMEs which possess Macro Event Property MEP It addresses all the issues critical to understanding TMEs in English and Chinese from event segmentation MEP principles and the conceptual structure of TMEs and their constituents to the representation of Actant Motion Path and Ground The book argues that the corpus based alignment for the TME segmentation in both languages the parameters of Actant Motion Path and Ground and their relevant statistical description are particularly important for understanding English and Chinese TMEs The linguistic materialization of Actant Ground Path and Motion together with a wealth of tables and figures offers convincing evidence to support the typological classification of English and Chinese The book's suggestions regarding the Talmyan bipartite typology and Bohnemeyer's MEP contribute to the advancement of TME studies and language typology and help learners to understand motion events and English Chinese typological similarities and differences *Making the Connection* Marilyn Paula Carlson, Chris Rasmussen, 2008 The chapters in this volume convey insights from mathematics education research that have direct implications for anyone interested in improving teaching and learning in undergraduate mathematics This synthesis of research on learning and teaching mathematics provides relevant information for any math department or individual faculty member who is working to improve introductory proof courses the longitudinal coherence of precalculus through differential equations students mathematical thinking and problem solving abilities and students understanding of fundamental ideas such as variable and rate of change Other chapters include information about programs

that have been successful in supporting students continued study of mathematics The authors provide many examples and ideas to help the reader infuse the knowledge from mathematics education research into mathematics teaching practice University mathematicians and community college faculty spend much of their time engaged in work to improve their teaching Frequently they are left to their own experiences and informal conversations with colleagues to develop new approaches to support student learning and their continuation in mathematics Over the past 30 years research in undergraduate mathematics education has produced knowledge about the development of mathematical understandings and models for supporting students mathematical learning Currently very little of this knowledge is affecting teaching practice We hope that this volume will open a meaningful dialogue between researchers and practitioners toward the goal of realizing improvements in undergraduate mathematics curriculum and instruction
