Cold War Photographic Diplomacy Darren Newbury, 2024-02-06 The emergence of newly independent African nations onto the world stage in the mid twentieth century precipitated a contest for influence among Cold War superpowers leading the United States to mount an international campaign of photographic diplomacy underpinned by a faith in the medium's capacity to cross cultural boundaries However the increasing global visibility of racial injustice undermined US claims that the nation had transcended colonial racism Drawing on extensive research in the archives of the United States Information Agency USIA and concentrating on the period from the mid 1950s through to the late 1960s Darren Newbury traces the role of photography in the United States appeal to Africa Newbury shows how photographing the political cultural and educational visits of Africans to the United States provided a space for the imagination of international cooperation and friendship how the United States presented the civil rights struggle as an example of democracy in action and how it pictured a world of integration and racial coexistence Cold War Photographic Diplomacy chronicles this careful scripting of images and picture stories and details the cultural and pedagogical work that photography was expected to perform as it was inserted into the visual culture of African cities through magazines posters pamphlets and window displays Locating photography at the intersection of African decolonization racial conflict in the United States and the cultural Cold War this study will especially appeal to students and scholars of the history of photography American studies and Africana studies

History Notes: Out of Many Marvin Schultz, 2005-08 On the Home Front Michele Stenehjem Gerber, 1992 The Hanford Site in southeastern Washington state was built by the Army Corps of Engineers and the DuPont Corporation during World War II to produce plutonium for America's first atomic weapons The gigantic facility was immediately successful producing and delivering in less than two years the plutonium for the world's initial atomic explosion and for the bomb dropped on Nagasaki that effectively ended World War II This first complete history of Hanford was made possible by the recent declassification of tens of thousands of formerly secret government documents relating to the construction operation and maintenance of the site It describes the releases planned and accidental of radioactive and chemical contaminants their pathways through the environment attempts to correct problems under conditions of rapid nearly chaotic change and the secrecy of government operations that made scientific review of Hanford processes virtually impossible Liberty, Equality, Power: To 1877 John M. The Cold War and After Marc Trachtenberg, 2012 A new way of looking at international relations from a leading expert in the field What makes for war or for a stable international system Are there general principles that should govern foreign policy In *The Cold War and After* Marc Trachtenberg a leading historian of international relations explores how historical work can throw light on these questions The essays in this book deal with specific problems with such matters as nuclear strategy and U S European relations But Trachtenberg s main goal is to show how in practice a certain type of scholarly work can be done He demonstrates how in studying international politics the conceptual and empirical sides of the analysis can be made to connect with each other and how historical theoretical and even policy issues can be tied together in an intellectually respectable way These essays address a wide variety of topics from theoretical and policy issues such as the question of preventive war and the problem of international order to more historical subjects for example American policy on Eastern Europe in 1945 and Franco American relations during the Nixon Pompidou period But in each case the aim is to show how a theoretical perspective can be brought to bear on the analysis of historical issues and how historical analysis can shed light on basic conceptual problems

European Security After the Cold War Edward Mortimer, International Institute for Strategic Studies, 1992 An assessment of the dangers to peace in Europe since the Soviet collapse and of the Western responses they require

Native Activism in Cold War America Daniel M. Cobb, 2008 Broadens the scope and meaning of American Indian political activism by focusing on the movement s early and largely neglected struggles revealing how early activists exploited Cold War tensions in ways that brought national attention to their issues

Defining Americans Mary E. Stuckey, 2004 Ranging broadly from Andrew Jackson to Bill Clinton and George W Bush Stuckey demonstrates how presidents accomplish the dual enactment of inclusion and exclusion through their rhetorical and political choices Our early leaders were preoccupied with balancing the growing nation later presidents were concerned with the nature and definitions of citizenship By examining the political speeches of presidents exemplifying distinctly different circumstances she presents a series of snapshots which when taken together reveal both the continuity and the changes in our national self understanding

Chronic Politics Philip J. Funigiello, 2005 Funigiello unlocks the puzzle of why the United States has never guaranteed its citizens health security comparable to that enjoyed by people of other first world nations and he tells what needs to happen for policy reform to take place

Examining

specific episodes in the history of health care financing he highlights the importance of key individuals in the legislative process the political haggling involved in shaping a bill the clash of personalities and agendas that determines its fate and the extent to which American ideas about fairness are reflected in the result

The rise of proxy wars the Space Race and cybernetics during the Cold War marked science and technology as vital sites of social and political power Women artists historically excluded from these domains responded critically while simultaneously redeploying the products of Technological Society into works that promoted ideals of progress and alternative concepts of human community In this innovative book author Christine Filippone offers the first focused examination of the conceptual use of science and technology by women artists during and just after the women s movement She argues that artists Alice Aycock Agnes Denes Martha Rosler and Carolee Schneemann used science and technology to mount a critique on Cold War American society as they saw it conservative and constricting Motivated by the contemporary American Women s Movement these artists transformed science and technology into new modes of artmaking that transgressed modernist heroic painterly styles and subverted the traditional economic structures of the gallery the museum and the dealer At the same time the artists also embraced these domains of knowledge and practice as expressions of hope for a better future Many found inspiration in the scientific theory of open systems which investigated problems of wholeness dynamic interaction and organization enabling consideration of the porous boundaries between human bodies and their social political and nonhuman environments Filippone also establishes that the theory of open systems not only informed feminist art but also continued to influence women artists practice of reclamation and ecological art through the twenty first century
