Chapter 20 Sound Wave Superposition

A pair of pulses travel toward each at equal speeds. The composite waveforms, as they pass through each other and interfere, are shown at 1-second intervals. In the left column note how the pulses interfere to produce the composite waveform (solid line). Make a similar construction for the two wave pulses in the right column. Like the pulses in the first column, they each travel at 1 space per second.

Quirky Quantum Concepts Eric L. Michelsen, 2014-02-04 Quirky Quantum Concepts explains the more important and

more difficult concepts in theoretical quantum mechanics especially those which are consistently neglected or confusing in many common expositions The emphasis is on physical understanding which is necessary for the development of new cutting edge science In particular this book explains the basis for many standard quantum methods which are too often presented without sufficient motivation or interpretation The book is not a simplification or popularization it is real science for real scientists Physics includes math and this book does not shy away from it but neither does it hide behind it Without conceptual understanding math is gibberish The discussions here provide the experimental and theoretical reasoning behind some of the great discoveries so the reader may see how discoveries arise from a rational process of thinking a process which Quirky Quantum Concepts makes accessible to its readers Quirky Quantum Concepts is therefore a supplement to almost any existing quantum mechanics text Students and scientists will appreciate the combination of conversational style which promotes understanding with thorough scientific accuracy
