A Good Teacher

A person who devotes himself in imparting education to young learners is called a teacher. He is the main architect of a nation and an asset to a country. He plays an important role in building up an educated nation. He dispels the darkness of ignorance from the lot of a nation and spends the light of education. He holds the attention and interest of his students and suits his act according to the need of his class. He is a clear speaker with a good, strong and arms, hands and fingers to explain and express his feelings and ideas. He makes lessons interesting. He keeps his students awake and makes them confident and proves them clever. A good teacher discovers the hidden treasure in each student. He also makes the students learn their lessons. He teaches them to follow the path of truth and virtue and avoid the path of vice. He teaches them to respect the elders and to be affectionate to the younger. He is, in fact, a friend, a philosopher and a guide to the young learners. A good teacher never hankers after money. His only thought is to present the nation a good and worthy citizen. He may aptly be called a guardian of civilization.

Brain Drain

When skilled and educated people of a country leave their home land and live and work in other countries it is called brain drain. This is a great loss to a country like Bangladesh where there is scarcity of skilled and talented people. Every year many skilled people like doctors, engineers and teachers leave their country and settle in the developed countries. These countries offer higher salaries and excellent living condition and other facilities to them. But it causes harm to the country from where skilled people are migrating, as the country does not get their service. Our country needs skilled teachers, doctors and engineers.
