

Philosophy of Counselling

If we want to discuss the philosophy of counselling as such, we have to go beyond the profession of counsellor, exploit the helping nature of human being starting in childhood. We have to expand outside the borders of humanity to all animal kingdom, where mother helps injured or scared young, to get over the trouble or deal with stress of the moment or situation, as these happened to everyone. Some are just short shocks from momentary exposure and some are longer lasting from distress developed into disorder.

In childhood, when we experience stressful situation, ideally we receive help from parents or other significant person in form of explanation and calming talk, which compare to paraprofessional or non-licensed counsellor. One might say that help of parent or other significant person in our life is the first counselling experience. As we grow into adulthood, we grow through experiences of more professional counselling. In school, beside a teacher or instructor, it might be paraprofessional or professional counsellor or psychiatrist, as it happens at work by manager and work counsellor or outside of work in medical environment. In cases of more serious need of help, we visit counselling agency or mental institution.

The necessity of help is quite evident in the cases of children and adults whom had no opportunity of getting help in the time of need and at later adulthood, in most, they are exhibiting strong signs of stress turning into psychological disorder. Most adults in counselling care shows, after a few sessions of counselling, stressors, which lead to childhood negligence or later, untreated mental stressors.

We would not be exploring philosophy of counselling, if we did not explore more closely the professional helpers and their psychological reasons for taking the burden of the profession.

(CACREP) What is professional counseling? Counseling is a professional relationship that empowers diverse individuals, families, and groups to accomplish mental health, wellness, education, and career goals.

People have many different reasons for deciding they want to become a counselor. Some people choose this career because they once had a good experience with a counselor during a difficult time in their own life and they want to "pay it forward." Another person may have done some volunteer work at a crisis hotline and realized that they enjoyed both the challenges and joys of working with clients facing difficult times. Yet another person may have been told that they are a good listener and they ought to consider working as a mental health professional.

Some individuals simply are looking for satisfying their ego, to make impact, or to have power and control over others.

"I have always desired to become a counselor since I was five years old. I have always loved helping people a wonderful lady in our community who worked in the counseling field was instrumental in encouraging me to follow my dreams." -Barbara Meeuen

(CACREP) Whatever the reasons, individuals that choose to seek a career in counseling usually have one thing in common - a desire to help people work through life's challenges and

Philosophy's Role in Counseling and Psychotherapy Peter Raabe, 2013-11-26 In *Philosophy's Role in Counseling and Psychotherapy* Peter Raabe argues that philosophy is an effective method in treating mental illness. Calling for a paradigm shift away from the standard belief that the brain and mind are identical, Raabe argues that so-called mental illnesses such as depression and schizophrenia are not the actual causes of psychological misery. Instead, they are just labels for symptoms. For example, the word depression is merely a label attached to a collection of symptoms such as sadness, hopelessness, and low self-esteem. Raabe posits that distressing or painful life events can cause symptoms that are often clinically labeled as the mental illness of depression. The suffering brought on by painful life events can often be alleviated with helpful discussions and without resorting to medications. Because philosophy is the foremost form of discussion, it means that the suffering that is labeled mental illness can be treated and even cured with philosophy. Raabe ultimately concludes that philosophy is beneficial in three ways: it can prevent the onset of a so-called mental illness in the person who studies it; it can be used to help individuals suffering from the distress that is labeled mental illness; and it will enhance the competence of the counselor or therapist who practices it.

Philosophy in Philosophical Counseling Unasked Questions Open Answers offers a base for criticizing approaches to philosophical counseling that fail to be philosophical or relevant to the counselees concerns It analyses the impact of tacit unexamined philosophical assumptions and examines their influence on the search for solutions while explaining how such assumptions may obstruct that search Ora Gruengard argues that conversations in which the participants disagree with each other are the adequate context for calling tacit assumptions into question and exploring alternatives Her research shows how philosophical assumptions change in informal conversations and illuminates their important role in education religious guidance and psychological treatments Nevertheless philosophical issues are best dealt with in explicit philosophical dialogues in which counselees are respected as philosophical partners who are encouraged to think critically and make their own judgments This book addresses counselors dilemmas by presenting examples of hypothetical counseling conversations and true sessions with real people Gruengard also discusses what kind of philosophical knowledge and expertise is necessary for doing the job adequately **Theories of Counseling and Psychotherapy** Cecil Holden Patterson,1986 **The Teacher's Role in Counseling** Mary G. harness their philosophical training and skills in helping others to address their life problems But is this channeling of philosophy outside the classroom into the arena of life a good idea Are philosophers as such competent to handle all or any of the myriad emotional and behavioral problems that arise in the context of life or should these matters best be left to those trained in psychological counseling or psychotherapy Through a diverse and contrasting set of readings authored by prominent philosophers philosophical counselors and psychologists this volume carefully explores the nature of philosophical counseling or practice and its relationship to psychological counseling and psychotherapy Digging deeply into this relational question this volume aims to spark more rational reflection and greater sensitivity and openness to the potential contributions of philosophical practice It is accordingly intended for students teachers scholars and practitioners of philosophy counseling or psychotherapy as well as those interested in knowing more about philosophical counseling or practice
