The fib Commission Prefabrication is eager to promote the development of all precast structural concrete products and to share the knowledge and experience gained to aid with practical design and construction. By issuing this comprehensive overview Guide to Good Practice a better understanding of design considerations structural analysis building physics use of materials manufacturing methods equipment usage and field performance will be provided. This document contains the latest information currently available worldwide. The Commission is particularly proud that this document is a result of close cooperation with PCI and that it is published by both the fib and PCI. This cooperation started six years ago first with comparing the different approaches to several issues then progressively integrating and producing common documents like this one that hasn't yet been treated in a specific Guide by either body. This Guide is intended to be the reference document to all who are interested in utilising the advantages of Precast Sandwich wall panels. In conjunction with the previously published Planning and Design Handbook on Precast Building Structures the designer will have significant resources to integrate sandwich wall panels into any applicable structure.
