

## Self-timer

Place the camera on a tripod or other steady support. Frame your picture. Indoors, plan to stand 2 to 10 ft. (.6 to 3m) from the camera. When you are ready, slide the control to the right once, toward the clock symbol (it will spring back). You now have approximately 12 seconds to get into your picture.

The red light on the front of the camera will flash at an increasing rate, becoming steady just before the flash fires. The camera will also beep at an increasing rate, becoming steady just before the flash fires. **To cancel the self-timer exposure**, simply slide the switch to the

right again. Closing the camera will also cancel it.

## Close-up lens accessory (optional)

With the optional close-up lens you can make images of  $\frac{1}{2}$  actual size from 10 to 14 inches.

To use the accessory, open the camera and hold it firmly by the flash tower. Attach the close-up lens accessory, placing its lens over the camera lens, and its diffuser over the flash.

Press the attachment until it snaps securely into place.

To measure the appropriate distance from your subject, stretch the neckstrap taut and place the metal loop at the subject. Then drop the strap, **maintain the distance**, and shoot.
