Development of a mobile application for carpooling the elderly Mohamed Lamine Fetni, 2020-03-27 Bachelor Thesis from the year 2019 in the subject Computer Science Applied language English abstract This thesis proposes a platform to help improve elder's mobility through carpooling a way for car drivers to share their private vehicle with more elders in order to splitting and reducing costs Carpooling may be one of the best solutions when there is no other mean of transportation to a specific location but naturally it is not the only one Mobile applications take more and more part of everyone's lives different services for carpooling with different features begin to compete with existing transportation solutions Some people start to prefer using new carpooling services over the traditional services represented by taxi services GoRide aims to promote carpooling by targeting elders making it easier for them to adhere and use this system In general people have a hard time conciliating their schedules because of the way they move from one location to another And elders suffer from this the most especially here in Algeria since transportation between cities is not that great As students we think there should exist more suitable transportation solutions to places where transportation networks are short and cheap and helpful for elders By targeting elders people will more likely join the service since its users are primarily other people from the same environment To put the carpooling system in place we have designed and developed an Android mobile application with backend servers for users to access the carpooling service through their smartphones additionally the application involves some features that are critical to the service By using Android Development Tools and Libraries and efficient backend solutions we have managed to make the application simple but powerful as well which makes this application very useful for the young and the old to use Our app GoRide will be a unique carpooling application that would take benefits of the advantages of carpooling and try to improve and eliminate the disadvantages all while focusing on making it a good

carpooling experience for elders The realization of our project will go through the conceptual phase and then development phase Since making a good application requires good planning first Transportation and Information Piyushimita (Vonu) Thakuriah,D. Glenn Geers,2013-06-18 Transformations in wireless connectivity and location aware technologies hold the promise of bringing a sea change in the way transportation information is generated and used in the future Sensors in the transportation system when integrated with those in other sectors for example energy utility and health have the potential to foster novel new ways of improving livability and sustainability The end result of these developments has been somewhat contradictory Although automation in the transportation environment has become increasingly widespread the level of involvement and active participation by people in terms of co creation and contribution of information has also increased As a result the following two major trends have been observed 1 increases in Machine to Machine M2M communications and 2 increases in the variety and volume of User Generated Content In this transportation paradigm the pervasive use of Information and Communication Technologies will serve as the foundation for mobility intelligence towards an ubiquitous information centered mobility environment However many technical and operational questions as well as social management and legal challenges present themselves in the transformation to this vision The book presents a non technical review of research and initiatives and a discussion of such opportunities and challenges **Kiplinger's Personal Finance** ,2010

Starting a new Business. Business Model, marketing and financial planning for "parkitch" Felix-Sebastian Ament,2022-02-14 Seminar paper from the year 2021 in the subject Business economics Company formation Business Plans grade 1 0 University of Applied Sciences Essen language English abstract All over the world people in big cities waste vast amounts of time and money looking for a parking space In addition to time and money groaning for a free parking space is also nerve wracking and environmentally harmful parkitch solves this problem For this purpose the author is creating a closed system that makes it possible to find free parking spaces Users can pass on their vacant parking space to another user Free parking spaces can be reserved according to the user s needs parkitch thus shifts the annoying search for a parking space to the online world automating the search for a parking space at a specific place and time This solution sets new standards in the field of autonomous and predictive parking and are thus one step closer to a fully connected automotive industry parkitch generates revenue in three ways a premium app subscription in app purchases and as an advertising platform The market focus is on unmanaged on street parking which is home to numerous user segments in private and commercial traffic The estimated market volume in Germany alone far exceeds billions Find Your Next: Using the Business Genome Approach to Find Your Company's Next Competitive Edge Andrea Kates,2011-10-18 THE NEXT BIG THING IN BUSINESS INNOVATION FROM THE NEXT GENERATION S BRAND WHISPERER What can an oil company Pennzoil learn from a great place to hang out Starbucks to create a new customer experience Jiffy Lube If you re a manager an executive or an entrepreneur you understand that your business is unique with its own challenges and rewards But thanks

to the new science of the Business Genome process you'll be surprised to see how many businesses share a similar genetic structure. And by understanding what works and what doesn't for your business's genomic type, you can play to your strengths, adapt to your weaknesses, and change the course of your company's future. Business Genome project creator Andrea Kates calls it Find Your Next, a field-tested, customized blueprint for mapping out your business DNA in four powerful steps: 1. Sort through your options and assess your hunches. 2. Match your genome to other successful business models. 3. Hybridize your company by grafting new ideas with proven successes. 4. Adapt and thrive by breaking old habits and starting new trends. This high-impact, transformative guide walks you through every step of the process, combining intuition and experience with statistical data and fascinating case studies. You'll learn how two unrelated businesses, Hyatt Hotels and Sharp HealthCare, discovered untapped opportunities in their customer experience. You'll read how General Motors and OnStar hit the jackpot by examining something that wasn't there. You'll find in-depth interviews with GE's Mark Vachon, IndieGoGo's Danae Ringelmann, P.F. Chang's Rick Federico, and other leaders of innovation. And you'll learn how to crack the genetic code behind the six essential building blocks of business: product and service innovation, customer impact, talent, leadership, and culture, process design, trendability, and secret sauce. Once you unlock the secret of your company's DNA, you can evolve your strategy, build your future, and find your next. PRAISE FOR FIND YOUR NEXT When you add it all up, this is indeed a time of great change, and arguably much of what we know about management today is becoming obviated. Which is why Find Your Next is such a helpful contribution to every manager's arsenal. It embraces the shift from industrial models to models for the 21st century. And it's a great read, packed with great stories and tons of practical advice. Read, enjoy, and prosper. Don Tapscott from the Foreword of Find Your Next Every great strategic thinker uses the ideas in this book, but it took Andrea Kates to write them down for the rest of us. Seth Godin, author of We Are All Weird. Andrea Kates is this generation's new brand whisperer, and Find Your Next is the best toolkit for landing on your company's next. Lane Cardwell, President, P.F. Chang's China Bistro. Andrea Kates's ideas about the Business Genome project are cutting edge. They will completely transform the way we think about the impact of cross-organizational connections as a way to fuel business growth. James Fowler, author of Connected: The Surprising Power of Our Social Networks and How They Shape Our Lives, and Professor of Medical Genetics and Political Science, UC San Diego. Find Your Next combines radical thinking, innovative insight, and real-world experience to give corporate leaders a powerful compass in this era of unprecedented economic challenge. Catherine Crier, former judge, journalist, and New York Times bestselling author. Years ago I thought about what was next for music fans and turned to lessons learned from NASCAR and the NFL, not other musicians, to come up with the inspiration for the Lollapalooza festival. That's exactly what Find Your Next provides: an easy-to-follow guide to game-changing innovation based on cross-industry thinking. Perry Farrell, founder of Lollapalooza festival and legendary rock frontman for Jane's Addiction. The difference between a great idea and a great business result is the ability to integrate

insights from lots of different sources and get an entire organization on board quickly Kates is onto something truly novel Find Your Next could easily become the new industry standard for innovation A must read Mark Vachon GE Company Officer If you thought you've been thinking creatively about your business get ready for a new ride In her book Andrea Kates describes the Business Genome approach a radically fresh roadmap to infuse innovative change into your business Pure magic Nick Pudar Vice President Strategy Adjunct Lecturer Farley Center for Entrepreneurship and Innovation McCormick School Northwestern University and independent innovation consultant Find Your Next brings together a collection of insights and approaches that challenge everyone in an organization from the CEO to the front line to be nimble and build new muscles for rapid innovation It disrupts the patterns of incremental growth from traditional strategic planning The result is a process that can get your organization to market faster and leapfrog the competition Alistair Goodman CEO Placecast
