June 1998 South Africa. Commission on Gender Equality. Information and Evaluation Workshop, 1998 Workshop held in Mpumalanga South Africa on the 23 June 1998 to assess what is being done to advance gender equality Eating from One Pot Sarah Mosoetsa, 2011-04-01 As poverty and unemployment deepen in contemporary South Africa the burning question becomes how do the poor survive Eating from One Pot provides a compelling answer Based on intensive fieldwork it shows how many African households are on the brink of collapse That they keep going at all can largely be attributed to the struggles of older women against poverty They are the fulcrum on which household survival turns This book describes how households in two different areas in KwaZulu Natal are sites of both stability and conflict As one of the interviewees put it We eat from one pot and should always help each other Yet the stability of family networks is becoming fragile because of the enormous burden placed on them by unemployment and unequal power relations Through careful analysis the experiences of survival are discussed in relation to the restructuring of the country's welfare and social policies and the extension of social grants Mosoetsa argues that these policies shape the livelihoods that people pursue in order to survive under desperate conditions but fail to address the root causes of poverty and inequality **The HIV Pandemic** Peter Piot, 2007-12-14 As we approach the 25th anniversary of the first recognition of HIV/AIDS in 1981 this book reflects on the international impact of the disease It has persistently remained a global issue with more than 50 million people worldwide estimated to have been infected since that date This ambitious book written by 165 authors from 30 countries offers a multi country comparative study that examines how the response to the common global threat of HIV is shaped by the history culture institutions and health systems of the individual countries affected Increasingly the shift of health systems has been from prevention only as the main containment strategy to a strategy that includes scaling up HIV treatment and care and prevention services including antiretroviral therapy Thus all parts of the health system must be involved policy makers healthcare professionals and users of the services have been forced to think differently about how services are financed how resources are allocated how systems are structured and organized how services are delivered to patients and how the resulting activity is monitored and evaluated in order to improve the effectiveness efficiency equity and acceptability of the response This book is unique in attempting to describe and assess a range of responses across the globe by situating them within the characteristics of each country and its health system Most chapters combine a health policy expert with an HIV specialist allowing both a top down health system approach and a bottom up HIV specific perspective There are thematic and analytical sections which provide an overview and some suggestions for solutions to the most serious outstanding issues and chapters which analyse specific country and organisational responses There is no perfect health system but the evidence provided here allows the sharing of knowledge and a opportunity to assess the impact and reactions to an epidemic that must be considered a long term issue
