**Asset Prices for Output (and Inflation) Forecasting** Gerret Halberstadt,2014-08-07 Seminar paper from the year 2014 in  
 the subject Economics Finance grade 1 0 Christian Albrechts University of Kiel language English abstract That financial  
 markets can influence real economic activity has been accepted by economists long ago and became dramatically apparent  
 again in the last financial crisis when the sharp decline in housing prices in the US was followed by a severe recession In  
 general asset prices are determined in a forward looking manner stock prices for example reflect the expected profitability of  
 firms in the future and thus are linked to expected future economic conditions Furthermore many macroeconomic models  
 suggested by economic theory in corporate interest rates interest spreads or exchange rates which can be seen as some sort  
 of financial assets and believing in these models means believing that asset prices influence developments of macroeconomic  
 variables in the future These considerations and observations gave rise to examine the predictive power of asset prices to  
 forecast output and inflation and a survey of this literature as well as empirical tests for a variety of predictors in different  
 countries can be found e g in Stock and Watson 2003      **Ec 205** David. N. Hyman,2012
