

### Information: Changes of Matter: Temperature Dependence

Scientists have found that the pressure inside a large steel gas cylinder filled with natural gas decreases as the outside temperature decreases. Scientists also have found that the rate of change of pressure with respect to temperature is not the same. **What conclusions can you draw from these data with the systems model?**

### Critical Thinking Questions

1. Explain the evidence for the following hypothesis:

as the outside temperature decreases,

the rate of change of pressure with respect to temperature

decreases in magnitude.

### Information: More Than One Possible Change

Many materials contract as they cool. Some change color as they contract. Copper wire, for example, contracts from  $100^\circ\text{C}$  to  $0^\circ\text{C}$ . In another example, some wires get longer as they contract. For example, a steel piano wire gets longer as it contracts slightly.

### Critical Thinking Questions

1. Copper contracts as it is cooled. It is proposed to contract as it cools by contracting as the length of the wire. What are other possible ways to contract as it cools?

as the length of the wire decreases,

as the length of the wire increases,

as the length of the wire remains the same,

as the length of the wire increases.

2. What are other ways to contract as it cools? (Other than contracting as the length of the wire decreases.)

as the length of the wire decreases,

as the length of the wire increases,

as the length of the wire remains the same,

as the length of the wire increases.

as the length of the wire decreases, as the length of the wire increases, as the length of the wire remains the same, as the length of the wire increases.

### Information: Possible Contracting Behavior Models

Two possible ways to contract as the length of the wire decreases are: (1) the length of the wire decreases as the length of the wire decreases, (2) the length of the wire increases as the length of the wire decreases. Both are possible. What are the correct answers for the questions in question 1 and 2?

as the length of the wire decreases,

as the length of the wire increases,

as the length of the wire remains the same,

as the length of the wire increases.

as the length of the wire decreases,

as the length of the wire increases,

as the length of the wire remains the same,

as the length of the wire increases.
