Civil Technology Grade 11 June Examination 2014:

Multicultural Literature in the Content Areas Larkia M. Scott, Barbara Purdum-Cassidy, 2020-03-18 Today's public schools represent a demographic of students that are more diverse than ever before. In turn, culturally responsive and affirming teaching practices should mirror the academic, social, and cultural needs of an ever-increasing population of diverse students. Through multicultural education, students can discover the ways they are shaped by their own culture as well as learn more about others. Multicultural education practices provide mutually beneficial dialogue between cultures and the pedagogical practices increase learning outcomes for not just the ethnically and racially diverse but all students who are participatory in the content. This book provides educational stakeholders with culturally relevant and affirming techniques for utilizing multicultural literature as a pedagogical tool in social studies, mathematics, science, and reading. Each chapter provides a brief summary about the selected multicultural text and also contains an instructional strategy to be used. Following this, an inquiry-based lesson is provided with supplementary materials and resources that allow for K-12 differentiation. *Feng Shui:*

Teaching About Science and Pseudoscience Michael R. Matthews, 2019-07-18 This book provides a richly documented account of the historical, cultural, philosophical, and practical dimensions of feng shui. It argues that where feng shui is entrenched, educational systems have a responsibility to examine its claims and that this examination provides opportunities for students to better learn about the key features of the nature of science, the demarcation of science and non-science, the characteristics of pseudoscience, and the engagement of science with culture and worldviews. The arguments presented for feng shui being a pseudoscience can be marshalled when considering a whole range of comparable beliefs and the educational benefit of their appraisal. Feng shui is a deeply entrenched three-millennia-old system of Asian beliefs and practices about nature, architecture, health, and divination that has garnered a growing presence outside of Asia. It is part of a comprehensive and ancient worldview built around belief in chi, qi, the putative universal energy or life force that animates all existence, the cosmos, the solar system, the earth, and human bodies. Harmonious living requires building in accord with local chi streams; good health requires replenishment and manipulation of internal chi flow; and a beneficent afterlife is enhanced when buried in conformity with chi directions. Traditional Chinese Medicine is based on the proper manipulation of internal chi by acupuncture, tai chi, and qigong exercise, and herbal dietary supplements. Matthews has produced another tour de force that will repay close study by students, scientists, and all those concerned to understand science, culture, and the science-culture nexus. Harvey Siegel, Philosophy, University of Miami, USA. With great erudition and even greater fluidity of style, Matthews introduces us to this now world-wide belief system. Michael Ruse, Philosophy, Florida State University, USA. The book is one of the best research works published on Feng Shui. Wang Youjun, Philosophy, Shanghai Normal University, China. The history is fascinating. The analysis makes an important contribution to science literature. James Alcock, Psychology, York University, Canada. This book provides an in-depth study of Feng Shui in different periods, considering its philosophical

historical and educational dimensions especially from a perspective of the demarcation problem between science and pseudoscience Yao Dazhi Chinese Academy of Sciences China **Water Conservancy and Civil Construction Volume 1**
