Down to Earth Dharma Rebecca Bradshaw, 2024-11-26 Buddhist teachings and heart centered practices from the feminine paradigm to embrace receptivity and bring more balance to your life relationships and the world With deeply thoughtful lyrical prose this book invites readers to engage with the world from a unique perspective that encourages feeling intuitive understanding embodiment interdependence and sacredness Weaving together classical Theravada Buddhist teachings and mindfulness practices the book teaches us when and how to channel our receptive and active orientations sometimes called the feminine and masculine paradigms to feel more at home in ourselves and the world and drop more deeply into the Buddhist teachings on suffering and happiness Rebecca Bradshaw a respected Buddhist teacher in the Insight Meditation community offers teachings that are simple yet require us to explore aspects of ourselves that go against much of

our social conditioning that values goal oriented busyness productivity independence outgoing energy and other active qualities When overemphasized this orientation can cause destructive emotions and behaviors but we can counter them by embracing more receptive qualities The receptive or feminine paradigm takes us deeper into the heart of the classical Buddhist teachings leading to openness and freedom of the heart mind Bradshaw illustrates her own resistance to letting go of her strong active orientation with relatable stories like her efforts to be a perfect meditator Drawing on our connectedness to nature she offers guidance for grounded practices including useless gazing getting lost sense based reality practicing in the wildness accepting uncertainty and more These Buddhist teachings are as comforting as they are thought provoking Bradshaw s debut book helps us let go and nurture our ability to receive listen embrace vulnerability and just be Through this process we heal the imbalances within ourselves and in our relationships to all beings and the natural world

The present ecological mutation has organized the whole political landscape for the last thirty years This could explain the deadly cocktail of exploding inequalities massive deregulation and conversion of the dream of globalization into a nightmare for most people What holds these three phenomena together is the conviction shared by some powerful people that the ecological threat is real and that the only way for them to survive is to abandon any pretense at sharing a common future with the rest of the world Hence their flight offshore and their massive investment in climate change denial The Left has been slow to turn its attention to this new situation It is still organized along an axis that goes from investment in local values to the hope of globalization and just at the time when everywhere people dissatisfied with the ideal of modernity are turning back to the protection of national or even ethnic borders This is why it is urgent to shift sideways and to define politics as what leads toward the Earth and not toward the global or the national Belonging to a territory is the phenomenon most in need of rethinking and careful redescription learning new ways to inhabit the Earth is our biggest challenge Bringing us down to earth is the task of politics today
