Babalola,Igbinobu Chuks,2015 **Civic Education** Ibiyemi Oyeneye,Michael Onyenwenu,Robert Akaniro,2011-01-01 Civic Education for Junior Secondary Schools is an exceptional course in Civic Education for Junior Secondary School Students The course has been written in full compliance with the Basic Education curriculum provided by the Nigerian Educational Research and Development Council and should fully equip the students for the Junior Secondary School Examination Every book in the course has been written in simple language to make it easy for the JS Students to understand Each topic in every book has been fully developed with examples the students can easily grasp and identify with Very clear apt pictures have also been used to illustrate the lessons in the books The authors are highly experienced teachers and WAEC NECO examiners who have also authored several highly successful Secondary School textbooks **Civic Education & Culture** Bradley C. S. Watson,2005 What do we teach our citizens This great Platonic question is as crucial today as it has ever been America and the West come to terms with this question in the context of their richly diverse technologically sophisticated fundamentally individualistic societies Virtually all would agree that such diversity sophistication and freedom are positive political and cultural goods but many would also argue that they militate against the coherence that all regimes and civilizations must in some way demand The nature extent and coherence of civic education are perhaps the greatest determinants of a regime s politics and culture and the regime can in turn do much to foster the right kind of civic education This book presents the insights of renowned scholars and writers including Stephen H Balch Timothy Fuller and Roger Kimball who have thought broadly and deeply about the role that education at all levels plays in promoting maintaining or undermining our politics culture and society **Civic Education** Richard G. Niemi,Jane Junn,2005-05-11 Sound democratic decisions rely on a citizenry with at least a partial mastery of the rules and workings of democratic government American high schools where students learn the basics of citizenship thus ought to play a critical role in the success of democracy Yet studies examining the impact of high school government and civics courses on political knowledge over the past quarter century have generally shown that these courses have little or no effect In this important book Richard G Niemi and Jane Junn take a fresh look at what America s high school seniors know about government and politics and how they learn it The authors argue convincingly that secondary school civics courses do indeed enhance students civic knowledge This book is based on the most extensive assessment to date of civic knowledge among American youth the 1988 National Assessment of Education Progress NAEP Civics Assessment The authors develop and test a theoretical model to explain the cognitive process by which students learn about politics and they conclude by suggesting specific changes in the style and emphasis of civics teaching Project Citizen ,2008 This process oriented program for use in the middle grades focuses on the role of state and local governments in the U S federal system **The Civic Textbook**

Civic Education in the Elementary Grades Dana Mitra,Stephanie C.

Serriere,2015-10-16 Based on a 5 year study of an elementary school with socioeconomic diversity the authors provide an active model of civic engagement organized into three settings Classroom School and Community Each chapter includes an overview of what research has demonstrated about civic engagement in that particular space offers detailed descriptions of activities and closes with lessons for practice This case study demonstrates how putting civics at the center of the curriculum gives purpose and motivation to traditional academic learning including tested subjects such as reading writing and mathematics As former elementary school teachers the authors focus on what is possible in schools rather than a romantic vision of what schools could be Classroom teachers school principals community members and teacher educators can use this resource to foster a deeper richer understanding of what is entailed in civic life

Civic Education for Diverse Citizens in Global Times Beth C. Rubin,James M. Giarelli,2013-10-11

This book explores four interrelated themes rethinking civic education in light of the diversity of U S society re examining these notions in an increasingly interconnected global context re considering the ways that civic education is researched and practiced and taking stock of where we are currently through use of an historical understanding of civic education There is a gap between theory and practice in social studies education while social studies researchers call for teachers to nurture skills of analysis decision making and participatory citizenship students in social studies classrooms are often found participating in passive tasks e g quiz and test taking worksheet completion listening to lectures rather than engaging critically with the curriculum Civic Education for Diverse Citizens in Global Times directed at students researchers and practitioners of social studies education seeks to engage this divide by offering a collection of work that puts practice at the center of research and theory

Making Better Citizens Civic Education Foundation, Cambridge, Mass,1952 **National Standards for Civics and Government** Center for Civic Education (Calabasas, Calif.),1994 Civic Education in the Twenty-First Century Donald M. Gooch,Michael T. Rogers,2015-09-18 Imagine an America where politicians governmental institutions schools new technologies and interest groups work together to promote informed engaged citizens Civic Education in the Twenty First Century brings together scholars from various disciplines to show how such a United States is possible today Inspired by Alexis de Tocqueville s analysis of American democracy in the early 1800s this edited volume represents a multidimensional

evaluation of civic education in its new and varied forms While some lament a civics crisis in America today Civic Education in the Twenty First Century raises hope that we can have an informed and active citizenry We find the activities of a number of politicians government institutions schools and interest groups as promising developments in the struggle to educate and engage Americans in their democracy New technologies and new innovations in civic education have laid the foundation for a revitalized American civic ecology With Civic Education in the Twenty First Century we call for the United States to make these practices less isolated and more common throughout the country The volume is broken into three major sections First there are four chapters exploring the history and philosophical debates about civic education particularly with respect to its role in America s educational institutions Then the second section provides seven groundbreaking inquiries into how politicians and political institutions can promote civic education and engagement through their routine operations As some examples this section explores how politicians through campaigns and judiciaries through community programs enhance civic knowledge and encourage civic engagement This section also explores how new technologies like the Internet and social media are increasingly used by government institutions and other entities to encourage a more politically informed and engaged citizenry Finally the third section contains six chapters that explore programs and practices in higher education that are enhancing civic education engagement and our knowledge of them From the virtual civics campus of Fort Hayes State to citizens academies throughout the country this section shows the possibilities for schools today to once again be civics actors and promoters

Barton, 2024-10-01 Speaking to the need to move beyond traditional formulations this textbook presents radical visions for transforming civic education in the United States Drawing on the experience of educators and scholars including those rooted in feminist queer abolitionist global and race conscious perspectives this work offers new practical ideas for civic education reform Responding to recent political crises many scholars educators and public commentators have called for a rebirth of civic education but these all are grounded in the premise that the goal of civic education should be to teach students about the U S Constitutional system and how to operate within it This book argues that the U S governmental system including the Constitution is infused with racist and anti democratic premises and procedures It asks How can we seek a new path one that is more democratic more equitable and more humane A diverse range of leading civic educators who are willing not just to push the boundaries of civic education but to operate outside its assumptions altogether explore what future possibilities for civic education might look like and how these innovative ideas could be implemented in the classroom Combining theory with practice **The Future of Civic Education** will be important
