2.

8.1 Introduction to Acids & Bases

Autoionization of Water:

This is an endothermic process- increasing the heat will shift the reaction to produce more H_3O^+ and OH^- . K_w increases (more products), both pH and pOH will decrease but pure H₂O will still be neutral.

$$K_w = [\text{H}_3\text{O}^+][\text{OH}^-]$$

Only digits to the right of the decimal are significant in pH and pOH values. See

$$\text{pH} = -\log$$

is sig. figs

In case of acidic solution $> [\text{H}^+] > [\text{OH}^-]$

$$\text{pH} < 7.00 \text{ at } 25^\circ\text{C}$$

In case of neutral solution $> [\text{H}^+] = [\text{OH}^-]$

$$\text{pH} = 7.00 \text{ at } 25^\circ\text{C}$$

In case of basic solution $> [\text{H}^+] < [\text{OH}^-]$

$$\text{pH} > 7.00 \text{ at } 25^\circ\text{C}$$

ION PRODUCT CONSTANT:

$$K_w = [\text{H}^+][\text{OH}^-] = 1.0 \times 10^{-14} \text{ at } 25^\circ\text{C}$$

$$K_w = K_a \times K_b$$

$$\text{pH} = -\log[\text{H}^+], \text{pOH} = -\log[\text{OH}^-]$$

$$14 = \text{pH} + \text{pOH}$$

Also known:

$$[\text{H}^+] = 10^{-\text{pH}} \text{ and } [\text{OH}^-] = 10^{-\text{pOH}}$$

3. The value of K_w for water at 0°C is 1×10^{-15} . What is the pOH of water at 0°C ?

a) 7.5

b) 8.0

c) 7.0

d) 6.5

Using Student Feedback to Improve Learning Materials Michael B. Nathenson, Euan S. Henderson, 2018-02-06 The use of self instructional learning materials presented through a wide range of media was becoming an increasingly pervasive and important part of the educational scene at all levels from infant school to university Much had been written both theoretical and practical about various aspects of the techniques for developing such materials

However one phase of the development process while generally recognised to be critical in producing materials of high quality and educational effectiveness had been relatively neglected in the literature This is the phase of trying out the materials in draft form on students collecting feedback and undertaking revision in the light of the ensuing data Based on considerable practical experience this book originally published in 1980 examines the planning and executing of the collection of feedback from students on self instructional learning materials concerned with various subject matters and presented through various media both printed and audio visual A brief survey of the development of materials based learning is provided in order to set the use of student feedback in context and to sort out some of the terminology in common use The main part of the book illustrates a step by step method through all the stages of the try out process from initial planning of the project to final revision of the materials Thus a particular approach to the process of trying out draft materials is advocated which is outlined by means of a case study Finally there is an examination of whether using student feedback to revise learning materials can actually improve their educational quality and effectiveness with particular reference to the approach described earlier Incorporating a full bibliography this study combines a comprehensive review of what is known about this crucial phase of developing learning materials with an original how to do it guide for practitioners which has itself been subject to extensive try out *Prentice Hall Physical Science Concepts in Action Program Planner National Chemistry Physics Earth Science* ,2003-11 Prentice Hall Physical Science Concepts in Action helps students make the important connection between the science they read and what they experience every day Relevant content lively explorations and a wealth of hands on activities take students understanding of science beyond the page and into the world around them Now includes even more technology tools and activities to support differentiated instruction *General Chemistry* Wismer,1997
