To engineers in charge of repair
or inspection of our products
Before repair or inspection, make sure to
follow the
instructions so that customers and
Engineers in charge
of repair or inspection can avoid suffering
any risk or
injury. Remodeling for which we shall not
be liable, the
onus of product liability (PL) shall not be
our
responsibility in cases where an accident or
failure is as
a result of unspecified parts being used or
due to
negligence during repair.

1.Use specified parts.
The system uses parts with special safety
features
against fire and voltage. Use only parts with
equivalent characteristics when replacing
them.
2.Place the parts and wiring back in their
original
positions after replacement or re-wiring.
For proper circuit construction, use of
insulation
tubes, bonding, gaps to PWB, etc, is
involved. The
wiring connection and routing to the PWB
are
specially planned using clamps to keep
away from
heated and high voltage parts. Ensure that
they are
placed back in their original positions after
repair or
inspection.
3.Check for safety after repair.

Check that the screws, parts and wires are
put back
securely in their original position after
repair. Ensure
for safety reasons there is no possibility of
secondary
problems around the repaired spots.
4.Caution in removal and making wiring
connection to
the parts for the automobile.
Disconnect the battery terminal after
turning the
ignition key off. If wrong wiring connections
are made
with the battery connected, a short circuit
and/or fire
may occur.
5.Cautions regarding chips.
Do not reuse removed chips even when no
abnormality
is observed in their appearance. Always
replace them
with new ones. (The chip parts include
resistors,
capacitors, diodes, transistors, etc). The
negative
pole of tantalum capacitors is highly
susceptible to
heat, so use special care when replacing
them and
check the operation afterwards.
6.Cautions in handling flexible PWB Before
working with
a soldering iron, make sure that the iron tip
temperature is around 270 Celsius degree.
Take care not to apply the iron tip
repeatedly (more
than three times) to the same patterns. Also
take care
not to apply the tip with force.
7.Turn the unit OFF during disassembly
and parts
replacement. Recheck all work before you
apply power
to the unit.
