Digital Library <http://www.acm.org/dl>      **Computer-Supported Cooperative Work** Uwe M. Borghoff, Johann H. Schlichter, 2013-11-09 The terms groupware and CSCW (computer supported cooperative work) have received significant attention in computer science and related disciplines for quite some time now. This book is a revised and extended version of the 2nd edition of the German textbook *Rechnergestützte Gruppenarbeit: Eine Einführung in verteilte Anwendungen*. It has two main objectives: first to outline the meaning of both terms and second to point out both the numerous opportunities for users of groupware and the risks of applying such systems. The book intends to introduce an area of distributed systems, namely the computer support of individuals trying to solve a common problem in cooperation with each other but not necessarily having identical work places or working times. Computer supported cooperative work is an interdisciplinary application domain. It can be viewed as a synergism between the areas of distributed systems and multimedia communication on the one hand and between those of information science and socio-organizational theory on the other hand. Thus the book is meant to help students of all these disciplines as well as users and developers of systems which have communication and cooperation within groups as top priorities.      **CSCW ...
