Subramaniam,2015-08-01 Mathematics and Science education have both grown in fertile directions in different geographic regions Yet the mainstream discourse in international handbooks does not lend voice to developments in cognition curriculum teacher development assessment policy and implementation of mathematics and science in many countries Paradoxically in spite of advances in information technology and the flat earth syndrome old distinctions and biases between different groups of researcher s persist In addition limited accessibility to conferences and journals also contribute to this problem The International Sourcebooks in Mathematics and Science Education focus on under represented regions of the world and provides a platform for researchers to showcase their research and development in areas within mathematics and science education The First Sourcebook on Asian Research in Mathematics Education China Korea Singapore Japan Malaysia and India provides the first synthesized treatment of mathematics education that has both developed and is now prominently emerging in the Asian and South Asian world The book is organized in sections coordinated by leaders in mathematics education in these countries and editorial teams for each country affiliated with them The purpose of unique sourcebook is to both consolidate and survey the established body of research in these countries with findings that have influenced ongoing research agendas and informed practices in Europe North America and other countries in addition to serving as a platform to showcase existing research that has shaped teacher education curricula and policy in these Asian countries The book will serve as a standard reference for mathematics education researchers policy makers practitioners and students both in and outside Asia and complement the Nordic and NCTM perspectives *Computing Curricula 2001* ACM/IEEE-CS Joint Curriculum Task Force,2002 This volume examines computing curricula for computer science

Computing Curricula 2001 ,2002 Cyber Security Education Greg Austin,2020-07-30 This book investigates the goals and policy aspects of cyber security education in the light of escalating technical social and geopolitical challenges The past ten years have seen a tectonic shift in the significance of cyber security education Once the preserve of small groups of dedicated educators and industry professionals the subject is now on the frontlines of geopolitical confrontation and business strategy Global shortages of talent have created pressures on corporate and national policy for workforce development Cyber Security Education offers an updated approach to the subject as we enter the next decade of technological disruption and political threats The contributors include scholars and education practitioners from leading research and education centres in Europe North America and Australia This book provides essential reference points for

education policy on the new social terrain of security in cyberspace and aims to reposition global debates on what education for security in cyberspace can and should mean This book will be of interest to students of cyber security cyber education international security and public policy generally as well as practitioners and policy makers *Computing Curricula 2001*, 2002 **Computing Curricula 2005** Joint Task Force on Computing Curricula Staff, 2006-08-01 This document is the first edition of the Overview Report that summarizes the content of the various discipline specific reports on computer science information systems computer engineering and software engineering It provides a perspective for those in academia who need to understand what the computing disciplines are and how the respective undergraduate degree programs compare and complement each other This report summarizes the body of knowledge for undergraduate programs in each of the major computing disciplines highlights their commonalities and differences and describes the performance characteristics of graduates from each kind of undergraduate degree program **Propovăduirea Evangheliei în Era Digitală** Liviu Vidican-Manci, 2020-06-19 Lucrarea P rintelui Liviu Vidican Manci reprezintă o punte de legătură între propovăduirea tradițională și cea din prezent și viitor a Bisericii Ortodoxe Române O punte de referință unică în literatura noastră de specialitate catehetică și omiletică Pr prof univ dr Vasile Gordon București Lucrarea se remarcă și impresionează mai cu seamă prin adâncimea și calitatea analizei la care este supus una dintre cele mai sensibile probleme cu care se confruntă Biserica în contextul societății contemporane catehizarea generației digitale Subiectul central supus analizei atrage atenția asupra importanței ce trebuie acordată modalităților prin care mesajul religios moral poate fi adaptat la nevoile și grila de lectură a noilor generații de tineri Pentru a îndeplini coerența și deopotrivă a înlăunța utilitatea demersul învestigativ este ghidat pe tot parcursul tezei de o interogație centrală este cateheza digitalizată mai eficient decât cea clasică în procesul de catehizare a tinerilor Prof univ dr Adrian Oprea Cluj *Curriculum Recommendations for Graduate Professional Programs in Information Systems* Association for Computing Machinery.
