Conceivability A Guide To:

Conceivability and Possibility Tamar Szabo Gendler, John Hawthorne, 2002-07-25 **Cosmological Fine-Tuning Arguments** Jason Waller, 2019-09-05 If the physical constants initial conditions or laws of nature in our universe had been even slightly different then the evolution of life would have been impossible This observation has led many philosophers and scientists to ask the natural next question why is our universe so fine tuned for life The debates around this question are wide ranging multi disciplinary complicated technical and at times heated This study is a comprehensive investigation of these debates and the many metaphysical and epistemological questions raised by cosmological fine tuning Waller s study reaches two significant and controversial conclusions First he concludes that the criticisms directed at the multiverse hypothesis by theists and at the theistic hypothesis by naturalists are largely unsuccessful Neither of these options can plausibly be excluded Choosing between them seems to turn on primitive and so hard to justify metaphysical intuitions Second in order to break the philosophical deadlock Waller moves the debate from the level of universes to the level of possible worlds Arguing that possible worlds are also fine tuned in an important and interesting sense Waller concludes that the only plausible explanation for the fine tuning of the actual world is to posit the existence of some kind of God like thing **Modal Epistemology After Rationalism** Bob Fischer, Felipe Leon, 2016-11-09 This collection highlights the new trend away from rationalism and toward empiricism in the epistemology of modality Accordingly the book represents a wide range of positions on the empirical sources of modal knowledge Readers will find an introduction that surveys the field and provides a brief overview of the work which progresses from empirically sensitive rationalist accounts to fully empiricist accounts of modal knowledge Early chapters focus on challenges to rationalist theories essence based approaches to modal knowledge and the prospects for naturalizing modal epistemology The middle chapters present positive accounts that reject rationalism but which stop short of advocating exclusive appeal to empirical sources of modal knowledge The final chapters mark a transition toward exclusive reliance on empirical sources of modal knowledge They explore ways of making similarity based analogical inductive and abductive arguments for modal claims based on empirical information Modal epistemology is coming into its own as a field and this book has the potential to anchor a new research agenda *The Rational Ontological Argument* Joshua R. Sijuwade, 2025-01-23 By developing a new ontological argument for the existence of God Joshua R Sijuwade presents an innovative approach that enriches the existing discourse with fresh insights and a contemporary perspective The ontological argument seeks to demonstrate the existence of God from an a priori standpoint and Sijuwade begins by addressing the substantial critique the modal argument has received He embarks on a rigorous exploration providing needed analysis and a positive iteration termed the Rational Ontological Argument rooted in a novel modal methodology known as Rational Modal Realism Using this new method Sijuwade focuses on demonstrating how the central concepts and theories within modal metaphysics and epistemology such as modal realism modal rationalism trope theory and ontological pluralism

offer a means to develop a victorious ontological argument Employing contemporary analytic methods and suggesting productive directions for further research Sijuwade makes a key contribution to philosophy of religion and re invigorates the age old philosophical argument for the existence of God Thought Experiments in Philosophy Sören Häggqvist,1996

Scotland, ed. by J.W. Lyall* J Watson Lyall,1886 **Human Thought** Joseph Mendola,1997-02-28 Mendola spends little time distinguishing human thought from horse sense and any possible ruminations of other creatures Nor does he acknowledge an distinction between conscious experience and thought content He develops a theory of content for human thought that delineates the things human can think constructs an account of the realization of such thought explains how thoughts with such a range of context might be constituted and how there might be people with such thoughts and argues that no coherent and humanly conceivable account of the realization of our thought is plausible because we cannot plausibly explain our experience He concludes that how we think we think what we think is not how we do in fact think we think Annotation copyrighted by Book News Inc Portland OR
