Powerful Ideas of Science and How to Teach Them Jasper Green, 2020-07-19 A bullet dropped and a bullet fired from a gun will reach the ground at the same time Plants get the majority of their mass from the air around them not the soil beneath them A smartphone is made from more elements than you Every day science teachers get the opportunity to blow students minds with counter intuitive crazy ideas like these But getting students to understand and remember the science that explains these observations is complex To help this book explores how to plan and teach science lessons so that students and teachers are thinking about the right things that is the scientific ideas themselves It introduces you to 13 powerful ideas of science that have the ability to transform how young people see themselves and the world around them Each chapter tells the story of one powerful idea and how to teach it alongside examples and non examples from biology chemistry and physics to show what great science teaching might look like and why Drawing on evidence about how students learn from cognitive science and research from science education the book takes you on a journey of how to plan and teach science lessons so students acquire scientific ideas in meaningful ways Emphasising the important relationship between curriculum pedagogy and the subject itself this exciting book will help you teach in a way that captivates and motivates students allowing them to share in the delight and wonder of the explanatory power of science

Matter and Energy, 2005 *Science Explorer: Sound and Light* Michael J. Padilla, Ioannis Miaoulis, Martha Cyr, 2009 Holt Chemistry Ralph Thomas Myers, 2004 *Understanding and Developing Science Teachers' Pedagogical Content Knowledge* John Loughran, Amanda Berry, Pamela Mulhall, 2006 There has been a growing interest in the notion of a scholarship of teaching Such scholarship is displayed through a teacher's grasp of and response to the relationships between knowledge of content teaching and learning in ways that attest to practice as being complex and

interwoven Yet attempting to capture teachers professional knowledge is difficult because the critical links between practice and knowledge for many teachers is tacit Pedagogical Content Knowledge PCK offers one way of capturing articulating and portraying an aspect of the scholarship of teaching and in this case the scholarship of science teaching The research underpinning the approach developed by the authors offers access to the development of the professional knowledge of science teaching in a form that offers new ways of sharing and disseminating this knowledge Through this Resource Folio approach comprising CoRe and PaP eRs a recognition of the value of the specialist knowledge and skills of science teaching is not only highlighted but also enhanced The CoRe and PaP eRs methodology offers a new way of capturing and portraying science teachers pedagogical content knowledge so that it might be better understood and valued within the profession
