Smith, 2004-01-01 Scare headlines about the first human clones appear in our newspapers Biotech companies brag about manufacturing human embryos as products for use in medical treatments Events are moving so fast and biotechnology seems so complicated that many of us worry we can't keep up But now Wesley J Smith provides us with a guide to the brave new world that is no longer a figment of our imagination but a reality just around the corner of our lives Smith unravels the mystery of stem cells and shows what's at stake in the controversy over using them for research He describes the emerging science of human cloning the most radical technology in history and shows how it moves forward inexorably against the moral consensus of the world But at the core of this highly readable and carefully researched book is a report on the gargantuan Big Biotech industry and its supporters in the universities and the science and bioethics establishments Smith reveals how the lure of huge riches mixed with the ideology of scientism threatens to impose on society a new eugenics that would dismantle ethical norms and call into question the uniqueness and importance of all human life At stake he warns is whether science will continue to serve society or instead dominate it In Consumer's Guide to a Brave New World Smith presents a clear eyed vision of two potential futures In one we will use biotechnology as a powerful tool to treat disease and improve the quality of our lives But in another darker scenario we will be steered onto the antihuman path that Aldous Huxley and other prophetic writers warned against half a century ago
