GENERAL

The Edge Pro thermostat by Carrier is a wall-mounted, low-voltage control which combines temperature and humidity control in either a single or two-zone unit. The Edge Pro thermostat can be set for 7-day, 5/2-day, or 1-day programmable operation. Different heating and cooling set points and times are programmable for 2 or 4 periods per day. The thermostat can also be configured for non-programmable operation. When operating as a non-programmable thermostat, the user will still have both temperature and humidity control.

The Edge Pro thermostat has no need for batteries to store user-configured settings in memory. During power loss, its internal memory saves settings for unlimited time, and the clock continues to run for at least 24 hours. An extension of Carrier's proven line of thermostats, the Edge Pro thermostat provides separate set points for heating and cooling in addition to humidification and dehumidification.
