Differential Equations with Boundary Value Problems, Textbook and Student Solutions Manual James R. Brannan, William E. Boyce, 2009-04-13 Brannan provides engineers with both an introduction to and a survey of modern methods, applications and theory of a powerful mathematical apparatus that will help them in the field. Section exercises of varying levels of difficulty give them hands on experience in modeling analysis and computer experimentation. New coverage is included on series solutions of second order linear equations, partial differential equations and Fourier Solutions and boundary value problems and Sturm Liouville Theory. The companion ODE Architect CD arms them with a user friendly software tool for computing numerical approximations to solutions of systems of differential equations and for constructing component plots, direction fields and phase portraits. Physical representations of dynamical systems and animations available in the ODE Architect enable engineers to visualize solutions routinely.
