Fan Forced Wall Heater RSH/RDH/TWH Series

Installation Instructions

Congratulations on purchasing a small wall heater from Dimplex North America. Your heater is manufactured using the highest quality materials and workmanship and will provide many years of trouble free service.

This heater is designed for permanent installation only, care should be taken to install according to the following instructions. All required clearances should be maintained, in addition all electrical wiring and connections should comply with local electrical codes.

! NOTE: It is extremely important to read all information labels. Care must be taken to ensure that the heater is rated the same voltage as the electrical supply wires. Failure to do so could result in unsafe heater operation as well as damage to the unit. If replacing an existing heater, check the labels of the old heater to ensure the voltage of the new heater is compatible.

All units should be controlled by means of a regulating thermostat. Certain models only are provided with built in thermostats, check the **Model Key Information** section for verification. Wall thermostats should comply with the voltage and wattage of all heaters on the circuit. Built in thermostats are not suitable for Register Grill Models.

All installations require the following components:

- 1) Recess Mount Box (Model 1011650100)
- 2) Heater Assembly (See nameplate Label)
- 3) Grill (Either Multi- Directional Style or Register Style)

An optional Surface mount box is available for installations that are not recessed in wall cavity.

Step 1 – Placement

All units are designed for placement in either interior or exterior walls. Care should be taken to provide a minimum of 8" clearance from floors, ceilings and adjacent walls. Once installed, the airflow through the heater should not be blocked in any way. Maintain three (3) feet clearance of objects from the front of unit. Maintain a spacing of three (3) feet between heaters in order to prevent re-circulation of heated air. Insulation surrounding the back and sides of the recess mount box will not affect performance. Ensure insulation is rated for temperatures up to 85°C.

! NOTE: Certain flooring and wall covering materials (particularly those incorporating clear vinyl materials tend to distort at temperatures in the vicinity of 60 C (140 F). Material shall be checked prior to installation to determine

Figure 2

! NOTE: Maintain a minimum clearance of 8" from adjacent walls, floors and ceilings on all four sides of the grill

if discoloration will occur. Units are not approved for placement in floors or ceilings. Do not install in any area where combustible vapors, gases, dusts or liquids are present. Fire or explosion may occur.

Step 2 – Mounting The Recess Box

Determine the desired orientation of unit. Provide an opening in wall 14 1/4" x 8 5/8" x 3 3/8" deep minimum. Care should be taken to install the recess box in the correct orientation to accommodate grill. **Note the position of the electrical entry knockouts and orient recess box according to Figure 1.** Ensure all required clearances are met.
