Elementary Mathematics Curriculum Materials Janine T. Remillard, Ok-Kyeong Kim, 2020-03-16 The book presents comparative analyses of five elementary mathematics curriculum programs used in the U S from three different perspectives the mathematical emphasis the pedagogical approaches and how authors communicate with teachers These perspectives comprise a framework for examining what curriculum materials are comprised of what is involved in reading and interpreting them and how curriculum authors can and do support teachers in this process Although the focus of the analysis is 5 programs used at a particular point in time this framework extends beyond these specific programs and illuminates the complexity of curriculum materials and their role in teaching in general Our analysis of the mathematical emphasis considers how the mathematics content is presented in each program in terms of sequencing the nature of mathematical tasks cognitive demand and ongoing practice and the way representations are used Our analysis of the pedagogical approach examines explicit and implicit messages about how students should interact with mathematics one another the teacher and the textbook around these mathematical ideas as well as the role of the teacher In order to examine how curriculum authors support teachers we analyze how they communicate with teachers and what they communicate about including the underlying mathematics noticing student thinking and rationale for design elements The volume includes a chapter on curriculum design decisions based on interviews with curriculum authors

Traditions in German-Speaking Mathematics Education Research Hans Niels Jahnke, Lisa Hefendehl-Hebeker, 2019-02-13 This open access book shares revealing insights into the development of mathematics education research in Germany from 1976 ICME 3 in Karlsruhe to 2016 ICME 13 in Hamburg How did mathematics education research evolve in the course of these four decades Which ideas and people were most influential and how did German research interact with the international community These questions are answered by scholars from a range of fields and in ten thematic sections 1 a short survey of the development of educational research on mathematics in German speaking countries 2 subject matter didactics 3 design

science and design research 4 modelling 5 mathematics and Bildung 1810 to 1850 6 Allgemeinbildung Mathematical Literacy and Competence Orientation 7 theory traditions 8 classroom studies 9 educational research and 10 large scale studies During the time span presented here profound changes took place in German speaking mathematics education research Besides the traditional fields of activity like subject matter didactics or design science completely new areas also emerged which are characterized by various empirical approaches and a closer connection to psychology sociology epistemology and general education research Each chapter presents a respective area of mathematics education in Germany and analyzes its relevance for the development of the research community not only with regard to research findings and methods but also in terms of interaction with the educational system One of the central aspects in all chapters concerns the constant efforts to find common ground between mathematics and education In addition readers can benefit from this analysis by comparing the development shown here with the mathematical education research situation in their own country **Big Ideas Math**
