not to be confused with Forex and stocks trading since there are certain differences between the markets Binary options are an easier form in the sense that they are easier to understand but as with every market they require a serious approach as well What characterizes binary options is that traders do not buy the assets they simply invest or bet on whether an asset will rise or drop in value They place trades on the potential price increase or decrease but never really own the asset Therefore binary options is often compared to gambling and it took a long time for the market to establish itself as a trading market defending itself by proving that it is far removed from a game of chance The truth is that it is a little bit of both and it depends on how traders see it If traders participate in the market as individuals with a trading plan and a clear strategy it certainly classifies as trading Nevertheless if traders approach the market like a game and make random trades they classify as gamblers There is no clear cut line in the options market since it is flexible and depends solely on how the trader approaches it Still binary options is one of the most popular markets right next to the trillion dollar Forex industry and they appeal to many market participants especially to beginners who find it easier to understand than the stock or Forex market for example
