Undoubtedly the progressive discovery of the body itself as a source of feelings and sensations as well as exploring the different possibilities of action and bodily functions constitutes necessary experiences on which children's thinking is built. Furthermore the affective relationships established in psychomotor education situations and particularly through play are essential for the emotional development of children. Physical Education Initiatives for Early Childhood Learners offers globalized educational practices, didactic approaches and proposals for intervention around motor development in the children ages 0-6 years. The book specifically explores laterality, coordination, relaxation, rhythm, etc. and how these are achieved through games, music and motor stories. This book is ideal for early childhood educators, physical education teachers, administrators, daycares, preschools, early childhood learning centers, researchers, academicians and students interested in physical education's role in early child development.
