Braun 237user Guide:

Reclaiming Space James S. J. Schwartz, Linda Billings, Erika Nesvold, 2023 *Reclaiming Space* is an innovative study of space travel's history, legitimacy, and future. The NewSpace movement that presently dominates spaceflight culture is characterized by distinctly Western free market capitalist values and associated with the space ambitions of the super wealthy. This book exists to incubate, illuminate, and illustrate a more diverse and inclusive conversation about space exploration. *Reclaiming Space* asks: What would space exploration be like if we prioritized or even simply acknowledged the perspectives and value systems of individuals who are disabled, aren't white, aren't male, or aren't characteristically Western in their values? What can these perspectives teach us all about space exploration and its value, or even its potential for harm that cannot be easily recognized or appreciated under the NewSpace status quo? And what should we be doing differently when it comes to space exploration? The twenty-seven original essays in this volume provide much needed perspective on space exploration by offering counterpoints to mainstream thinking about space. Essays address subjects such as the history and development of spaceflight culture both within and outside the United States, the impact of science fiction and space art on how we conceptualize space, diverse cultural narratives and responses to space, and the ways space exploration might be leveraged in support of repairing injustices. *Reclaiming Space* also considers what our responsibilities might be as a spacefaring species in the distant future. Contributors include academics who research space exploration, spaceflight culture, space ethics, and space policy, as well as space artists and authors of award-winning science and speculative fiction. Written for space enthusiasts of all backgrounds, *Reclaiming Space* is an engaging, provocative volume of essays showcasing the perspectives of women, persons of color, and others who are typically left out of discussions of space exploration.
