successfully engage with contentious debates about the challenges of Covid but rather critically distant texts and thematic contexts that typically place the self in the position of other like travel narratives This book sits at a previously unconsidered intersection between debates around interdisciplinary collaboration and communication theories of intercultural contact and encounter and the role of the Humanities in tackling global issues      *Artificial Intelligence Systems and the Internet of Things in the Digital Era* Abdalmuttaleb M.A Musleh Al-Sartawi, Anjum Razzaque, Muhammad Mustafa Kamal, 2021-05-28 This book brings together intelligence systems and the Internet of Things with special attention given to the opportunities challenges for education business growth and economic progression of nations which will help societies economists financial managers engineers ICT specialists digital managers data managers policymakers regulators researchers academics and students to better understand use and control AI and IoT to develop future strategies and to achieve sustainability goals EAMMIS 2021 was organized by the Bridges Foundation in cooperation with the Istanbul Medeniyet University Istanbul Turkey on March 19 20 2021 EAMMIS 2021 theme was Artificial Intelligence Systems and the Internet of Things in the digital era The papers presented at the conference provide a holistic view of AI education MIS cybersecurity blockchain Internet of Ideas IoI and knowledge management      *Epidemic Cinema* Julia Echeverría, 2023-12-08 This book examines the recent trend in global cinema to feature infectious disease As the global crisis of the COVID 19 pandemic materialised the anxieties and discourses of world risk that had long been portrayed in popular media the book provides a novel definition of the epidemic film genre and offers a systematic look into the narrative and stylistic conventions that characterise it Epidemic Cinema traces the evolution of the genre from its early cinematic origins to establish the founding principles of a genre standing at the crossroads between science fiction and horror It draws on close textual analysis to show how the pandemic reified one of the central predicaments of epidemic narratives the constant tension existing between free floating phenomena and the impulse to control and resist such phenomena ultimately epitomised by the trope of the border Showing how infectious diseases offer a rich allegorical frame which cinema uses to articulate timely anxieties of growingly invisible and deterritorialised risks the author presents the prevalence of contagion in popular culture as a symptom of this growingly viral and virus ridden context both in its most literal and metaphorical sense This insightful study will interest students and scholars of film studies global cinema science fiction horror popular culture and genre theory      *Horror Components* Benjamin Lee, 2025-05-05 Horror Components explores the captivating yet terrifying nature of horror narratives by dissecting the psychological mechanisms and structural elements that make them effective It investigates how horror films trigger primal responses exploiting vulnerabilities through suspense surprise and even disgust The book also analyzes narrative components such as plot development and character design as crucial elements for creating lasting horror experiences This book uniquely emphasizes the interplay between psychological principles and narrative strategies It moves beyond cataloging horror tropes to explain why they are effective providing valuable insights for writers For example the
