The Legitimacy of International Organizations Jean-Marc Coicaud, Veijo Aulis Heiskanen, 2001 The end of the Cold

War is only one in a series of events that have radically modified the operational environment of international organizations since their establishment. These changes, many of which have lately been discussed under the term globalization, include decolonization, growing awareness of the global nature of many economic, environmental, and public health problems, multiplication of non-governmental organizations, globalization of mass media and the market, rapid developments in the field of biotechnology, and the emergence of new information technologies, particularly the Internet. These developments suggest that the time has come to take a fresh look at the philosophy of international organization.

The Legitimacy of International Organizations presents the results of an interdisciplinary research project of the Peace and Governance Programme of the United Nations University. The authors are prominent experts in the fields of social and political philosophy, law, political science, economics, and environmental studies.

The Role of International Institutions in Globalisation John-ren Chen, 2003. In an increasingly globalised world, it is becoming ever more difficult for nation states to adapt to the international consequences of market failures, government failures, and global externalities without co-operation and co-ordination with other countries. In the absence of any form of world government, the most effective solution to this problem is either to create new international institutions, reform existing ones, or work within the prevailing institutional framework. This book presents a critical analysis of the role of international institutions and their performance in terms of justification, effectiveness, and efficiency. The authors begin by discussing the controversies surrounding the Tobin Tax in the context of global governance. They move on to address important global issues where international institutions play a significant role. These include trade and FDI in relation to the WTO and the reconciliation of order and justice in the international trading system. Further chapters investigate development issues and international institutions, most of which were not designed for the specific needs of developing countries. They assess whether international institutions can actually help to mitigate the tendency of uneven development in the global economy. Finally, the focus switches to the analysis and evaluation of one specific institution and its actions, namely the Bank for International Settlements (BIS). This important theoretical and empirical analysis of the problems relating to the creation, evolution, and role of international institutions will be of interest and value to academics and researchers of international trade, international economics, international relations, and economic development.

Globalizing Africa Malinda Smith, 2003. At the outset of the twenty-first century, Afropessimism permeates both the scholarly and popular literatures on Africa. In the dominant discourses, Africa is constructed as hopeless, hemmed in on the periphery, and even as left out of the global economy.
