

BRANDS THAT MAKE THE BEST CARS

We rank automakers from best to worst on their scores and survey results.

by JEFF S. KRAVITZ

How we made the rankings: The Report based its automaker brand scores on four key factors: (1) our tests, including owner satisfaction and safety; (2) the reliability index, which we built through more than 10 years of data; (3) the reliability index, which we built on previous reporting; and (4) the industry's reputation for quality. These rankings are based on data collected from 2013 to 2023. We also included a "Best Overall" category, which is based on the overall quality of a brand's cars, taking into account all of the factors listed above. We also included a "Best Value" category, which is based on the overall quality of a brand's cars, taking into account all of the factors listed above.

and vehicle longevity of its automakers, who show you in the right direction when making a new car purchase. These ratings are based on the average Overall Score, a combination of our most recent reliability index and owner satisfaction data, and safety for

all of the models from each automaker. The top five brands this year are the same ones as 2023, with BMW leading the pack with an 87 score, followed by Subaru (78), leading manufacturer brand (76), and then Toyota (77). This year, for both companies, a clear consistent combination of high

and low scores and very good predicted reliability. Porsche takes the third position with a score of 80. Both Porsche and Cadillac moved up 10 positions this year due to their improved reliability. Keep in mind that even high scoring brands can have some lower performing

models, so be sure to check the ratings (see page 46) for the auto you're considering. This is especially true for bigger brands like Ford and Toyota, which have some models that performed far better than others in our tests. (If the brands CR ranked this year

were recommending every model scored from about 80th, Porsche, Honda, Kia, Mazda, and Audi. Simply put, the car has no tested model from those companies with confidence. There are also brands that don't have a single model recommended by CR. Consider

carefully when buying one of those.) To be included in the brand ranking, CR has to have tested at least two current models from a company. We've tested only one model from Lotus, Polestar, and Ram, so they aren't included this year.
