

We ranked 34 brands based on the Overall Scores of their models, which include road tests, reliability, satisfaction, and safety.

The annual readings of 10 antennas can move you in the right direction after making a very cost purchase. These readings are based on the pre-processed data, a combination of our read-out system, ground stability and ocean conditions data, and using by all of the sample from each antenna.

The top two breaks did not cut the same case as (31), with (32a) leading the pack with an 82 point score, followed by failure, the leading instrument scored at 50. The key to both competitors is their consistent combination of high end low score and very good practical reliability. Perhaps taken the third position with a score of 50, both Pancha and Cullin scored an 80 on the same test, due to their instrument reliability.

Keep in mind that even high-ranking brands can have some lower-performing models, so be sure to check the ratings for your favorite. The same goes for insurance. This is especially true for bigger brands like Ford and Toyota, which have more models that performed better than others in our tests.

If the 14 brands I listed this year, we're recommending every model tested from across BMW, Porsche, Honda, Acura, Kia, Mazda, and Volvo. Simply put: You can buy any model tested from these companies with confidence. (There are many brands that don't have a single model recommended by J.D., including Acura, Buick, GM, Alfa Romeo, Volkswagen, Lotus, MINI, Infiniti, Land Rover, and more. Consider carefully which buying site you choose.)

To be included in the annual ranking, a firm has to have earned at least two percent double-digit growth from a company. We're most only one added from Laidlaw, Pillsbury, and Rite, as they aren't included this year.

- 1 The **Overall Score** for individual models is based on five key factors: the road test, reliability, owner satisfaction, and safety.
- 2 For the road-test score, we put vehicles through more than 50 tests.
- 3 **Reliability and** **owner satisfaction ratings** are based on questions reported by members from all possible vehicle areas in J.D.'s annual satisfaction survey.
- 4 **Owner satisfaction** from predictions are based on whether J.D. members said in our survey that they'd buy the same vehicle again if given the chance.
- 5 **Safety** is based on a comparison of any available crash-test results and safety points assigned to vehicles that come standard with key crash-protection systems.
- 6 **Green Choice** refers here simply to a brand's J.D. rated vehicle for overall the designation for being in the top 10 percent of vehicles with the cleanest emissions, according to the EPA.
