Edexcel GCSE Geography B

Paper 1 - Global Geographical Issues - Hazardous Earth-Work Booklet

This is a very strong answer, containing several ideas. The cause of a tsunami is identified, along with the explanatory point of the energy causing waves. Further explanation is given regarding plate movement, a mark 3

Explain processes fully. Do not expect extensions to fill in the gaps for you

10. (1) Explain the cause of a tsunami.

A tsunami is caused by a release of energy caused by an earthquake which sends waves through the water. The earthquake is caused by a build up of pressure between two plates which then push past each other, releasing energy.

With this type of question, as well as identifying the physical process causing a tsunami, some explanation is needed as to how this process leads to wave formation.

This is a typical response. A difference in between volcanic types is identified for a mark but there is no explanation as to why this difference occurs. 2 mark

Remember in 'explain' questions, one factor needs to be identified and then developed with two explanatory points

11. (1) Explain the difference between the type of volcanoes found at divergent and convergent plate boundaries.

At divergent plate boundaries, the volcanoes are faster and not spread out. On the other hand, the volcanoes at convergent plate boundaries have sharp sides and are more narrow.

Extra Notes/Improved answers:

Edexcel January 1998 Paper B Hb1

Glenn Toole, Susan Toole

Edexcel January 1998 Paper B Hb1:

New Understanding Biology for Advanced Level Glenn Toole, Susan Toole, 1999 Intended for AS and A Level Biology and related courses this book provides coverage of the subject criteria and also offers option topics such as Biotechnology and Human Health and Disease Included are multiple choice questions for revision and examination questions for practice
